Manual Processes

Time Consuming

Unsecure Access

**Risk of Loss
or Damage**

The Challenge

Estée Lauder Cosmetics Ltd. (Canada) was using a manual process for the retrieving, handling, filing and distribution of their Human Resources employee records. Manual processes made it both time consuming and labour intensive for staff to retrieve and share documents. In addition, storing documents in their original paper format left them at risk for loss or damage.

The company wanted to convert their paper based HR employee records to secure and easily retrievable electronic images and make them easily available online to their authorized users.

The Solution

Octacom offered Estée Lauder a proven Records Conversion Service to cost-effectively convert and archive their HR employee records.

DOCUMENT IMAGING SERVICES

- › With Octacom's Document Scanning and Imaging Services, a complete electronic file was created for each existing employee record.
- › Records are now secure, yet easily accessible in an electronic image format. No more lost or damaged documents.
- › All new documents are sent to Octacom on a periodic basis where they are scanned, indexed and processed.

ODISS™ DOCUMENT MANAGEMENT SOFTWARE

- › To retrieve their electronic HR employee documents, Estée Lauder implemented Odiss™ to provide their HR staff with web-based access to their centralized employee files.
- › Electronic HR employee documents can be quickly searched, retrieved, viewed, printed, faxed and emailed.

The Results

With Octacom's Records Conversion Service, Estée Lauder has increased productivity and reduced costs. Their Human Resource staff now has fast, secure and timely access to information. Since paper file management (document storage, retrieval and supplies) has been eliminated, costs have been reduced. With their Human Resource employee documents securely stored in electronic format, Estée Lauder now has a permanent record in case of backup or disaster recovery.

More Case Studies

Learn more about how our solutions and services have helped our clients.

LAFARGE

Improved processes related to managing over a half million delivery tickets annually.

HAMILTON HEALTH SCIENCES

Scanned and indexed over 86 million patient records for seven Hamilton hospitals.
