

# **AUTOMATION APP**

METER READS AND SUPPLY REPLENISHMENT **MADE EASY!**

## **LDI CONNECT'S AUTOMATION APP**

---

- Automates your meter reads on networked devices for accurate billing
- Monitors current supply levels on a majority of networked devices
- Has no cost and no additional fees
- Is installed by LDI Connect's specialists, partnered with your IT professionals
- HIPAA compliant

CONTACT LDI CONNECT'S AUTOMATION APP TEAM

**[FMAuditGroup@myLDI.com](mailto:FMAuditGroup@myLDI.com)**

**LDI Connect's Automation App** may be launched from a Windows Host with restricted user permissions to the target network.

Although SNMP commands support both read and write operations, **LDI Connect's Automation App** only reads networked devices and does not modify any default or custom device settings.

**LDI Connect's Automation App** allows audit information to be sent from the target network to a remote destination as an XML stream (default port 443). By default, this information is encrypted, and requires a user and pass combination for authentication.

Only the information which is extracted may be saved or transferred to **LDI Connect's Automation App**. The end-users' confidential data files are not viewed or saved by LDI Connect's Automation App. **LDI Connect's Automation App** does NOT see who or what is printing.

#### **HIPAA COMPLIANCE**

- **LDI Connect's Automation App** is 100% compliant with all HIPAA rules and regulations, ensuring your private information stays confidential.

#### **MINIMUM REQUIREMENTS**

##### Microsoft Windows (x86/64)

Requirements:

- Windows 7, 8, 10, Server 2008 R2, Server 2012, Server 2012 R2, Server 2016, and Server 2019

- .NET 4.5.2 or higher

##### macOS (x64)

Requirements:

- Sierra (10.12) or higher
- Mono 5.4 or higher

## **HOW IT WORKS**

---

### **COLLECT METERS FROM NETWORKED DEVICES**

**LDI Connect's Automation App** automates and simplifies meter reading activities, reducing manual intervention and delivering accurate results. The noninvasive application automatically creates a snapshot of all networked devices in a matter of minutes. Encrypted usage data is sent directly to a secure LDI Connect location at predetermined intervals.

### **COMPLIANT WITH STANDARD DEVICES**

**LDI Connect's Automation App** captures meter data from most standard networked devices, including MFPs, copiers and printers. The application automatically detects changes to your fleet, saving you the time and effort in identifying additions and eliminations.

### **GET IT STARTED QUICKLY IN ANY LOCATION**

It's easy to get **LDI Connect's Automation App** installed and running. Our specialists can assist in remotely installing the application. We can even set up the application during the installation of your new equipment!

The ease of installation requires little involvement from your on-site IT department.

### **AUTOMATED TONER REPLENISHMENT FOR NETWORKED DEVICES**

**LDI Connect's Automation App** can automate supply shipments by sending alerts when your consumable levels get low for most devices. Our specialists can check to see if your devices report supply levels, then set up alerts to send your supplies automatically when they reach a certain level.
