

## Building Knowledge. No Matter What.

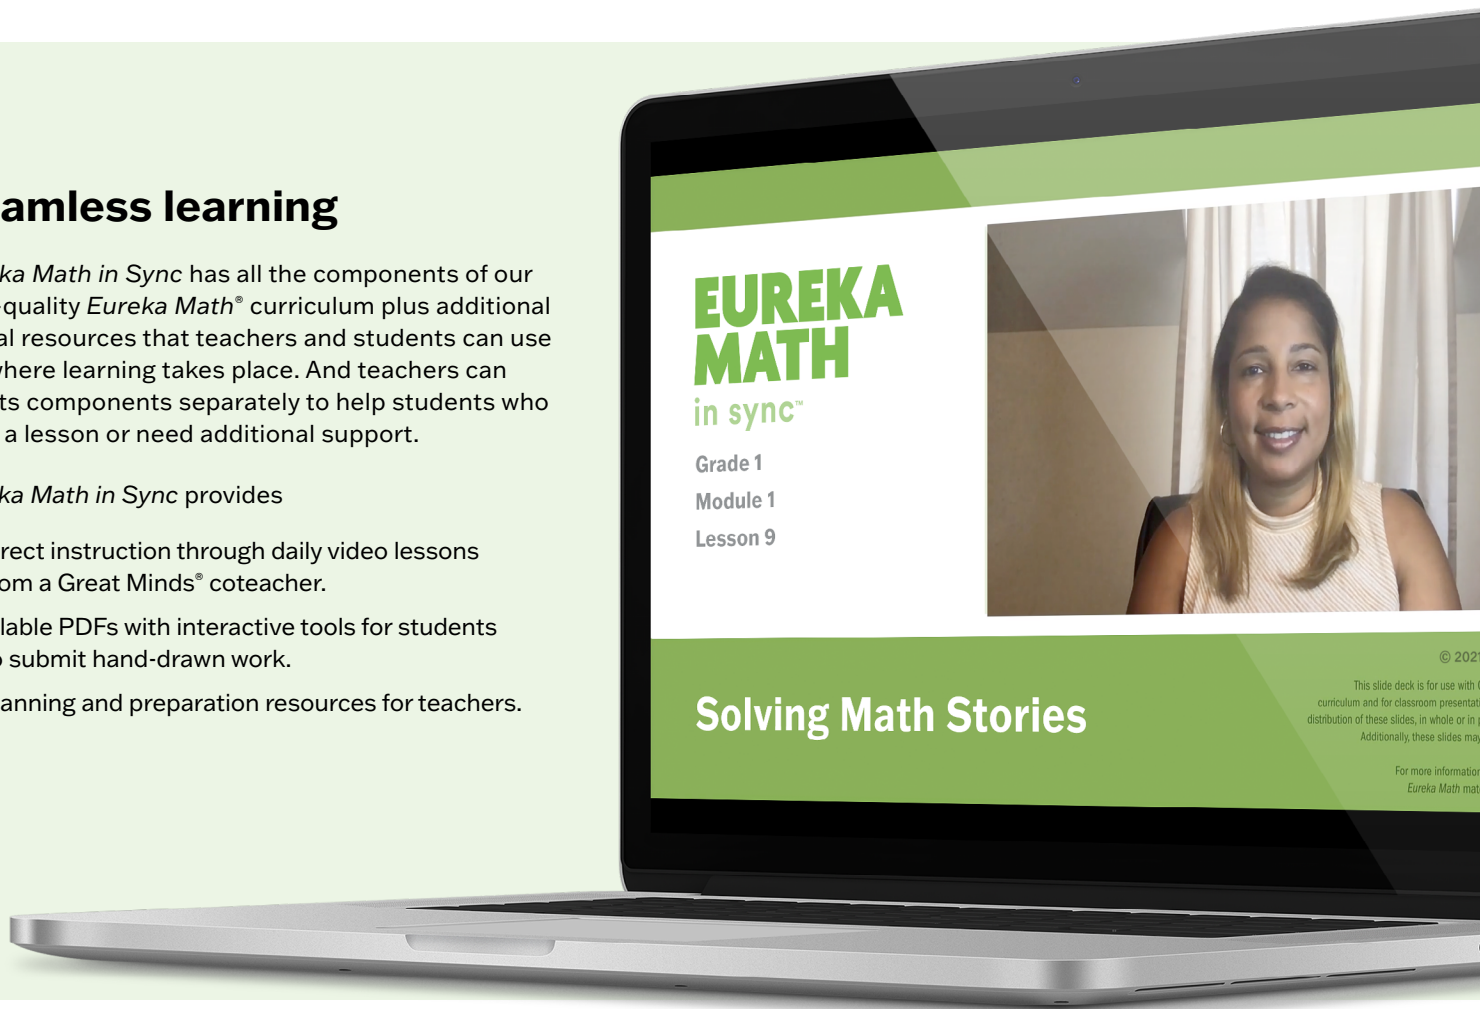

*Eureka Math in Sync™* creates a hybrid learning environment that allows students and teachers to seamlessly toggle between the classroom and the living room, so that learning continues no matter where the student is.

### Seamless learning

*Eureka Math in Sync* has all the components of our high-quality *Eureka Math®* curriculum plus additional digital resources that teachers and students can use anywhere learning takes place. And teachers can use its components separately to help students who miss a lesson or need additional support.

*Eureka Math in Sync* provides

- direct instruction through daily video lessons from a Great Minds® coteacher.
- fillable PDFs with interactive tools for students to submit hand-drawn work.
- planning and preparation resources for teachers.

every child  
is capable of  
greatness

# Support beyond the classroom

## For teachers

- **Learn Anywhere Plans**

These plans provide teachers with a playbook for pairing video instruction with in-class facilitation, for planning assessments, and for pacing the module to meet the unique needs of their instructional calendar.

- **Topic Facilitation**

These slides include topic-specific content that directly supports the recommended online or in-person facilitated instruction.

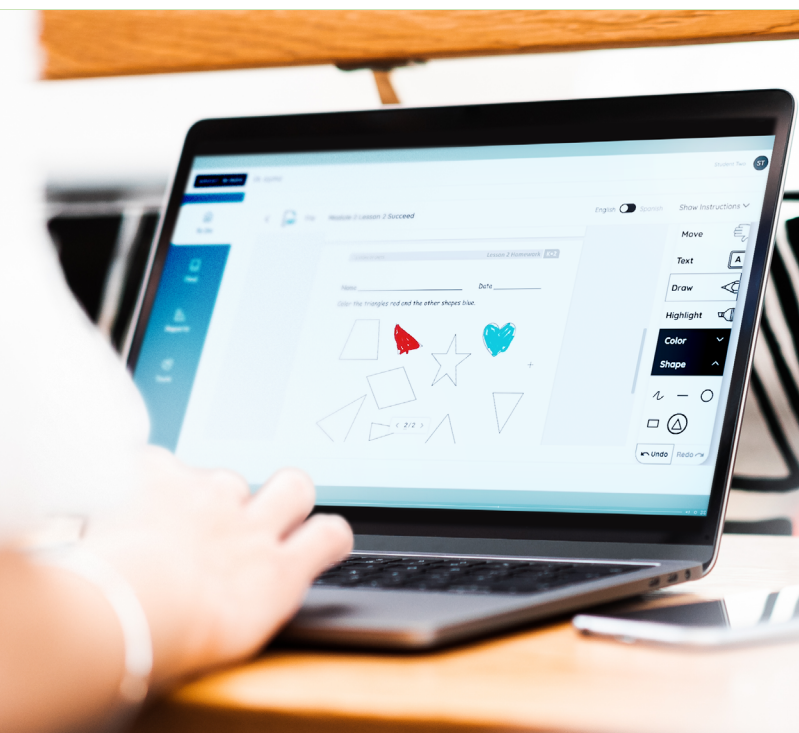

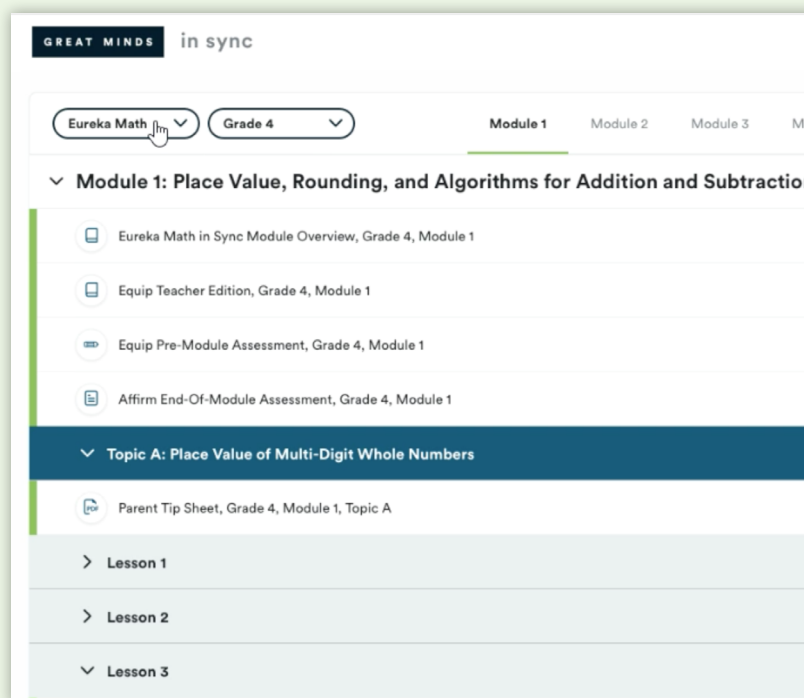

- **Eureka Math in Sync User Guide**

A guide to support educators as they get up and running with *Eureka Math in Sync*.

- **Eureka Digital Suite\***

The Eureka Digital Suite provides two exceptional online resources—the Eureka Navigator and Teach Eureka video series—that put the entire *Eureka Math* curriculum and hundreds of hours of PD videos at your fingertips.

\*Eureka Digital Suite is a separate, required purchase to support learning with *Eureka Math in Sync*.

## For students and families

(Available in English and Spanish)

- **Daily Video Lessons**

These videos provide daily direct instruction from a Great Minds teacher adapting intentional segments of *Eureka Math* lessons to a virtual environment, including conceptual development and working through examples and exercises to support learning from home.

- **Fillable PDFs**

A full set of student materials are available and can be edited to include student responses—both digits and hand-drawn work—through *Eureka Math in Sync*. Students can more easily complete their work online, and schools can choose to print and distribute the PDFs or ask students to print at home.

- **Family Guidance**

Family Tip Sheets for each *Eureka Math* topic help support at-home learning.
