

FOLLOW UP TO PREPARATION AND CUSTOMIZATION OF A EUREKA MATH[®] LESSON

Session Objectives:

Participants will understand

- engage in doing the math and studying the trajectory of content to understand the larger math story and,
- use their understanding of the math story and the three-step process—Discern the Plot, Find the Ladder, Hone the Lesson—to prepare for instruction and customize lessons to give all students access to content.

TIME	AGENDA	DESCRIPTION
Prework 1 hour	Technical Orientation Discern the Plot	In preparation for this session, participants will <ul style="list-style-type: none"> • briefly review the module’s Table of Contents, recalling the overall story of the module and analyzing the role of this lesson in the module, • read and annotate the Module Overview and Topic Overview related to the lesson and then complete the Exit Ticket of each lesson in the topic, • review the assessment following the topic and, • solve the entire Problem Set and Exit Ticket (if applicable) of the lesson that will be customized during the session
Zoom Session 90 minutes	Opening Discern the Plot Find the Ladder Hone the Lesson Closing and Evaluation	During this virtual PD session, participants will <ul style="list-style-type: none"> • explain the importance of study as an integral part of the preparation process, • describe the impact of doing the math of the lesson and how this allows teachers to make intentional decisions when customizing and, • customize the lesson to meet the needs of all students.
Postsession Work		To extend learning from the session, participants will use the Preparation and Customization process for an upcoming lesson.
