Focus on your core business

While Tap 'n Fuel manages the fuel bill.

Tap 'n Fuel gives every small business owner, fleet owner, fleet manager or person responsible for fleet activities an effortless, hassle-free way to pay for fuel. From professional services to plumbers, landscapers, to florists, we're helping small business owners and managers with fleets of all sizes focus on their core business while Tap 'n Fuel manages the fuel bill.

Level-up your customer service

Your customers expect next-level service.

And there's no reason why you shouldn't exceed their expectations.

The Tap 'n Fuel fleet fuel payment solutions and mobile app re-imagines fuel payment, fuel bill tracking and management of your fleet's fuel spend. With Tap 'n Fuel, you can focus on your business and take your delivery service offering up more than just a notch, but to a whole new level.

Track it all from your mobile

You're a business owner and entrepreneur.

And we developed Tap 'n Fuel for you – to be your fleet manager and business partner on the go.

Your time is of the essence, and with Tap 'n Fuel, you can quickly access dashboard reporting on the fly or top up your pre-paid wallet on the go.

Fleet fuel re-imagined

The 1st FREE to use fleet fuel payment solution in South Africa

Zero risks. More reward.

Tap 'n Fuel has no cost to the user and is the first free to use contactless fleet fuel payment solution in South Africa. How is it free? As a fleet loyalty product allowing, Tap 'n Fuel is free to use at any participating Shell service station. What's more? Our NFC technology requires no upfront costs or excessive capital expenditure.

Everything you need in one place.

A re-imagined way to manage your fuel bill.

Getting started with Tap 'n Fuel is convenient and hassle-free. That's because the only hardware needed is your smartphone and a Tap 'n Fuel NFC-sticker. Simply register, fund your pre-paid e-wallet, and place your NFC order, and we'll courier your NFC-stickers and our onboarding toolkit with step-by-step instructions straight to your door.

Getting started is easy and convenient.

No more bank fleet fueling facilities, bank credit checks, credit guarantees, excessive transaction fees, or loaned money to pay for fuel. Tap 'n Fuel uses your own cash linked to a pre-paid e-wallet, giving you full control of your fleet's refueling.

Get started in 7 easy steps

1. Download the Tap 'n Fuel app from the Apple AppStore or Google Play Store.
2. Register with your company details and verify your email address.
3. Fund your pre-paid wallet via PayFast or EFT.
4. Add your vehicle/s to your account to order your NFC stickers for door-to-door delivery.
5. Our courier delivers your NFC-stickers on step-by-step onboarding guide.
6. Apply the NFC sticker to your fleet vehicle, and link the NFC sticker to the corresponding vehicle via the app.
7. Now your fleet can refuel at your nearest participating Shell service station.

The NFC sticker is attached to the inside of the vehicle's windscreen, and is linked to your pre-paid wallet in the Tap 'n Fuel mobile app.

The mobile app is set up and configured by the owner or administrator of your business to link fleet vehicles to NFC stickers and access your fleet's fuel spend through built-in interactive dashboards accessible in-app.

When your fleet vehicle arrives at a participating Shell service station, the attendant taps your vehicle's NFC sticker with the service station's handheld financial terminal, identifying the vehicle and checking your pre-paid wallet balance.

If you've topped up, the fuel transaction is authorised and your driver can fill up.

Features

Simplified technology

All you need is a smartphone and NFC stickers. That's it! No upfront costs or capital expenditure for expensive hardware. NFC-stickers are durable, easy to apply, and eliminates the need to ground your fleet for installation.

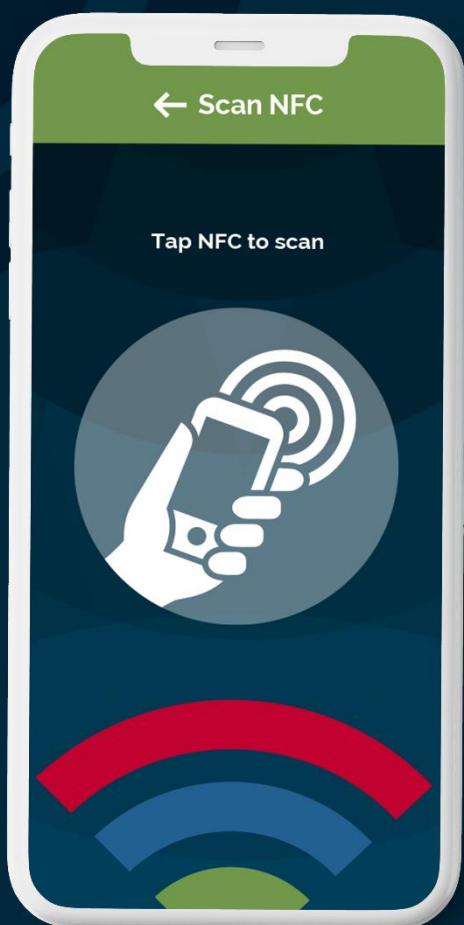

Interactive dashboards

Free access to interactive PowerBI dashboards provides visualisation of your fleet fuelling data with easy drill-down into transaction data.

Site Finder & Navigation

Use your current location or search for a Tap 'n Fuel site near you.

Convenient control

Tap 'n Fuel replaces cash, local service station accounts, and the use of personal or company credit cards without compromising on convenience.

Blacklisting

When a vehicle or sticker is stolen, you can quickly blacklist it to prevent further fuelling.

Pre-paid Wallet Manager

Create, fund and top-up your pre-paid wallet in the Tap 'n fuel app using PayFast Instant EFT or traditional EFT.

NFC & Fleet Manager

Order NFC stickers for delivery by adding a vehicle to your profile. When your stickers arrive, link your fleet vehicles in the Tap 'n Fuel app by scanning the NFC sticker with your smartphone's camera.
