

# TECHNOLOGY CHECKLIST FOR A SAFER SCHOOL BUS

From daily transportation to an emergency situation, communication between school bus drivers to Dispatch is critical. This technology checklist will help ensure maximum safety for students and drivers.

## PUSH-TO-TALK (PTT)

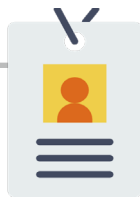

- Instant 4G LTE radio communication.
- Dispatch Software dashboard for easy, mass communication.
- Speak 1-to-1 or 1-to-many.

## SILENT ALARM

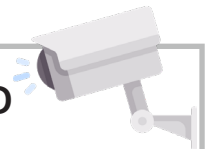

- Instantly alert dispatch of an emergency on the school bus.
- Email and/or SMS text notification.
- Turn PTT radio to “Hot Mic” to hear a live feed from the school bus.

## RIDERSHIP

- Visualize routes and riders for bus drivers.
- Check-on and check-off the busy easily.
- Keep parents updated in real-time.

## CAMERA OFFLOAD

- Automatically download data to school servers as the buses arrive in the lot.
- Streamline video review process.
- Increase team efficiency by automating data downloading.

## WI-FI

- Filtered, 4G LTE Internet access is the connectivity component to help improve student behavior and bus driver focus.
