Laminating Film

UNILAM Gloss & Matte Laminating Film

MADE
IN
JAPAN

Jet technologies is proud to introduce Unilam range of films to the market.

Unilam films are the latest creation from Jet Technologies. Using cutting-edge adhesive technology from Japan, they provide a superior bond to virtually any kind of print - digital or litho. Tested extensively and approved by most of the leading digital print manufacturers, they are perfect for use in digital and mixed environments as well as when print is to be highly embellished requiring the highest levels of bond and security.

Both Gloss (Uni-Gloss) and Matte (Uni-Matte) films are available in the following standard sizes:

Standard Width (mm)	Standard Length (m)
----------------------------	----------------------------

318	333
318	2000
445	2000
510	2000
640	2000
710	2000

Standard Sample films are also available on request
