

**INSPIRI**

# Online data talkshow Cloud transformation i Alm. Brand

# Why did the Cloud data platform become top priority?

Acceleration of Digital Transformation 

Increase in user and system demands 

We are expected to predict and recommend 

Act on data to be truly data-driven 

# How to get your data & AI transformation right

Data & AI roadmap

### People

Build an organization with strong capabilities and the right mindset

### Delivery process

Create process for fast and consistent delivery that guarantees the value of data

### Platform

Build a strong cloud data platform supported by the right tools with future needs in minds

### Data

Know that data is an asset that now comes in many flavors to many users and systems

Operating model

# Cloud transition models

## 1

### Migration & Catch-up

We design, scope, plan and migrate - and teach you about the cloud when you see it in action

## 2

### Co-creation

We do it together. We take the lead but are focused on moving your employees to the cloud by doing an educational track and involving them actively in the project.

## 3

### Full service

You have made a strategic decision about not trying to gain and keep the cloud competencies in-house. Inspari takes the full responsibility for both migration, maintenance, support and succeeding development projects.

# Inspari as a full service provider

## Transition framework

A proven framework to guide you and secure quality

## Inspari cloud services

Inspari add-ons where we see our clients needs some more than the market currently provides

## Specialist advisory

Who doesn't need guidance on how to adopt a cloud mindset, on specific technologies and on how to create value through data. Inspari provides it all.

## World-class Support

You want to spend your time on developing your business – let us take care of the daily maintenance and operations
