## We are preparing for your future!

This FinTech Internship will give you the opportunity to gain amazing insights into the financial and technology landscape around the globe, working with and supporting some of the leaders and innovators in Financial Technology.

Our partner organisations are established companies working on Financial Technology. This Internship allows you to gain relevant and valuable work experience and knowledge from home.

Internships are project based and we offer flexible working hours that can range from 20 to 40 hours per week. You will gain access to a new global network of professionals in the industry who will help further your career!

Our Host Companies understand what the industry expect from their new hires, it is our goal to connect our students to top leading companies in the Financial Technology industry and help them develop skills specific to their desired career path.

*"This is way beyond my expectations! The job is very related to what I like and find interesting in the finance industry and what I'm studying at university.*

*I saw some subjects in class that I was already experiencing in my internship, it helped me understand how to put in practice the theory I'm learning at school. My supervisor is great and we have developed very good communication"*

**Josh Anna, Nazareth College**  
**Remote Internship for a FinTech in London**

## Companies Overview

Scribe Labs, is based in London. Scribe is explaining the world's data. They're building technology that enables decision-makers with intelligent storytelling. Their advanced AI-powered technology delivers fully automated analysis that powers the financial services industry.

FusionPay is a smart pay-tech company based in London. Through their integrated mobile payment solutions, Chinese customers can pay Chinese Yuan directly without exchanging. They partnered with Alipay, WeChat Pay, Unionpay, among others to connect EU merchants to overseas customers.

HEX Trust is based in Hong Kong. HEX mission is to provide tools and solutions for institutional investors to access digital assets. At HEX they believe that blockchain will be the underlying technologies for future financial instruments, currencies and contracts. With this in mind, they aim to become the leading institutional custodian for digital assets.

RootAnt provides global financial institutions with easy to use and user-friendly investing platform, and products & services that improve investors experience. The platform is a better experience financial platform built with modularity at its core, a deep suite of fully integrated, back-end, middleware and front-end services and applications, connecting with APIs. RootAnt cooperates with clients and partners in more than 10 countries.
