

Mahr® | Precision measurement and solutions

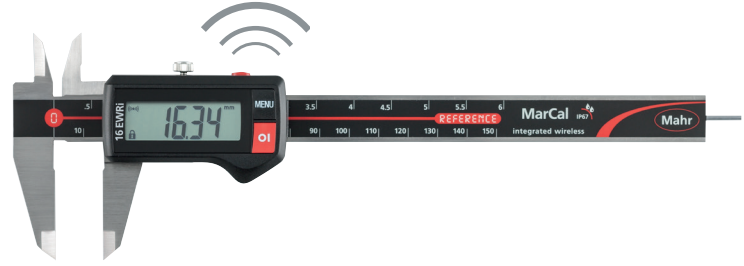

Logo Here

Comprehensive product range with Integrated Wireless data transmission

Mahr offers a comprehensive range of measuring instruments with Integrated Wireless data transmission for use in all areas of industrial manufacturing and quality control. The Integrated Wireless range from Mahr delivers accurate measuring results with full mobility. Modern, simple measuring solutions – without the limitations of wired technology.

Integrated Wireless gages include:

- Digital depth gages
- Digital micrometers
- Digital calipers
- Digital indicators

Mahr | Innovative hand tools
Why collect measurement data?

- Observation of production tolerances – manufacturing cost optimization
- Optimization of manufacturing process
- Identification of methodical mistakes
- Quality documentation for customers
- Quality documentation from suppliers
- Recognition and confidence on the part of the business partner

Mahr | Benefits of Marcom
Integrated Wireless data collection

- Transparent, accurate data collection with Integrated Wireless
- Less cluttered work areas, no tripping over gage-related cables
- Significant cost savings over plug-in transmitters – wireless data collection at the price of a cable
- Cost savings in workpiece scrap and inaccurate data entry
- Flexible, real-time manipulation and monitoring of data and transfer to third party data collection software

Free MarCom Professional 5.2 Software Interface

Conventional measuring station –with cable connection

Innovative measuring station – with Integrated Wireless
