

Stay ahead of online threats

We understand that keeping track of cyber threats is not easy.
That's why we help you recognize and fight them.

Cleafy LABS provides you with detailed reports and analyses about the latest threats discovered by our Threat Intelligence team. Our purpose is to share useful information to help you improve your fraud management.

By having prompt access to our technical reports you will be among the first people worldwide to be informed about:

</tags>

Patterns of attacks

Snippets of malicious code

List of IOC's

List of malware commands

Geographical distribution of the attacks

What does it mean in practice?

Take a look at what we have already discovered

SharkBot: A new generation of Android trojans is targeting banks in Europe

Cleafy tracked down a new Android banking trojan that is able to bypass behavioural detection countermeasures through ATS techniques.

Who's behind ?

Cleafy LABS is an initiative launched in 2021 by Cleafy and led by our Threat Intelligence team, a group of fraud hunters whose objective is to study, prevent and identify all possible threats in the cybersecurity world.

Information means power, and for us sharing this information means empowering businesses to keep customers safe and free from the worries of the digital world.

All this with one mission only: making technology a safer place.
