

Educate, empower & protect the entire school community.

**I am genuinely delighted that you are receiving exclusive access to our Safer Schools App provided in partnership with Zurich Municipal.**

As the former and founding head of CEOP and current Independent Chair of a number of safeguarding children boards, I recognise the opportunities and the real challenges schools face in the digital world.

My experience tells me that the best way to keep children safer is by educating and empowering them. That is why your new school App is central to the Safer Schools Package. The App puts the information you need, where you need it, when you need it – in your pocket.

The App content is maintained, updated and refreshed everyday by our Safeguarding Team and is tailored to meet the needs of your entire school community at all levels. Inside the App pupils, parent/carers and staff gain access to contemporary and credible information that is relevant for them.

Our aim is to work with partners to make children safer and to that end help you plant seeds in young minds that positively influences your pupils as they grow. The App content includes age appropriate fun resources, easy to understand advice and signposting for parents and carers, as well as CPD courses for school staff. Functions within the App provide access to the school calendar, news and push notifications to some or all your school community and much more.

I look forward to seeing you at one of the face-to-face training events you are able to access as part of the package. If there is anything I can do to help, if you want to talk about the App, give us feedback or simply seek advice on a safeguarding issue please do not hesitate to call me.

**Kind regards,**

**Jim Gamble QPM**
