## Delivering Innovative, Powerful, & Secure Technology

Continuous investment in our products and infrastructure ensures you have the most advanced tools for managing your operation while giving you peace of mind that your data is secure and accessible at all times. Our commitment to the evolution of our products starts with our 100% US-based product development team. We work closely with operations of all shapes and sizes to build easy-to-use yet powerful solutions.

## Setup & Access

- 100% cloud-based SaaS platform with no software or hardware to install.
- Compatible with all common operating systems and web browser-agnostic.
- Native mobile applications for iPad, iPhone, and Android.
- Secured with multi-factor authentication (MFA) and optional single sign-on (SSO).

## System & Data Security

- US-based SSAE18 data centers with state-of-the-art security.
- Deployed on Amazon Web Services with multiple geo-replicated backups.
- 256-bit SSL encryption and protection against SQL and XSS exploits.
- Continuous 24/7/365 system monitoring and 99.99% SLA uptime.

## Development & Tech Stack

- Microsoft SQL Server, .NET, JS, HTML5, Native iOS & Android.
- Agile and scrum development methodology with frequent releases.
- Top US-based talent with a strong focus on technical and design excellence.
- Rigorous and multi-tiered testing before all releases.

## API Specifics

- REST-based architecture that provides performance, scalability, and simplicity.
- All Flightdocs Enterprise operations can also be performed through the API.
- Extensible with a clear path for integrating with any other system.
- Already successfully integrated with over a dozen partner applications.
- Backed by our unwavering 24/7/365 customer support.
