Mobile Flight Department Management

Real-time, **up-time** - where and how you need it.

On the road or in the hangar, our **native mobile apps** are designed to provide secure and reliable access to your data and up-to-date information from anywhere in the world. The immediate benefits include **reduction of paperwork, elimination of duplicate tasks, and a faster process to access, update and sign off records in real-time.** Our apps are compatible with iPad, iPhone, & Android devices in order to ensure a **seamless user experience.**

Maintenance Tracking.

Mobile aircraft maintenance tracking and management is critical for smooth and continuous operations. DOMs, pilots, technicians, and crew all benefit from real-time, instant access into the status of their aircraft and department directly from their mobile device.

What you can **access on mobile:**

|			
Maintenance Information Center	Work Orders *	Non-Routine Maintenance	Electronic Signature *
Checklist	Electronic Logbooks *	Bulk Compliance Action *	Pilot Dashboard

Inventory Management.

Manage your inventory and procurement process all from an iPad. Fully integrated with your maintenance department, get instant access to parts, requests, orders, and reports in real-time on the hangar floor, on the road, & everywhere in between.

What you can **access on mobile**:

Inventory Dashboard*	Item Catalog*	Inventory Requests*	Purchase Orders*	Inventory Reports*	Barcode Scanning*

Flight Operations.

Seamlessly connecting your pilots and crew to scheduling and maintenance with a mobile app that works online or offline. Real-time access to schedules, currency, status, & communications all from their device.

What you can **access on mobile:**

Flight Logs	FD	Connect	Duty Time Tracking	Currency Tracking
