

# Creating, Publishing & Integrating Scheduling Widget Buttons

## Create a button

To create a booking button, navigate to the **Installation** page, on this page inside the box titled "Install Online Scheduling" click the button to the right that says **Create New**, from there name the button, select which company the button is for (or create one if you haven't yet), and click the button in the upper right corner that says **Add**.

## The installation Page

Once the button is created, it will be displayed on the Installation page. Click the **Install** button to access various integrations.

This will open a popup window containing pre-generated code ready to be copied and pasted. Here you can see that the Online Scheduling button can be published to a website using HTML or and iFrame, Facebook page, Direct URL, email signature or QR code.
