The #1 Requested OEM Warehouse Automation Solution for Sage 100

Designed with more than 28 years of experience in barcoding automation, Scanco Warehouse 100 will change the way you work forever.
Pioneers in Mobile Warehouse Automation Technology

Warehouse 100 is true automation at its finest. With seamless integration into Sage 100 and developed natively to run on iOS and Android environments, Warehouse 100 from Scanco is the most advanced and trusted technology on the market today for Sage 100 users.

Master and take control of your distribution process using the simplicity of Warehouse 100 with the familiarity of iOS and Andriod hardware. Built for speed and efficiency, Warehouse 100 gives you control of your operation out of the box.

Pre-built hardware profiles are included in the application and require mere minutes to configure. Designed around the user experience with a visually appealing interface, it takes minutes to train your users. All of this means you will be up and running without long implementation times.

Build A Solution That Meets Your Needs

Every company has unique needs when it comes to the level of automation they are interested in implementing. Scanco has structured our solutions with that flexibility in mind. With features like Advanced Shipping, Live Validation, and Batch Select; Scanco Warehouse 100 has the functionality of a complete warehouse management solution that will not only scale with your business but, drive growth.

Runs On iOS, Android, Windows Mobile Devices

For the first time, users can choose what device they want to use to manage inventory for Sage 100. Scanco Warehouse 100 will run on rugged Windows-based scanners, phones, tablets, and desktops. Use iOS and Android devices with Scanco Warehouse 100, lowering your hardware costs exponentially. With the freedom of picking your platform, the hardware can be mixed and matched, so you don't have to choose just one operating system.

Live Validation - No More Syncing

There is nothing worse than shipping the wrong product to your customer or paying for a product you have not received. Scanco Warehouse is built with a direct connection to your database to verify every item as it is shipped or received. Never "Sync" again and make accuracy the rule in your warehouse.

Voice Command Capability

Utilizing voice technology, Scanco Warehouse will speak the location, item description, and quantity to the pickers, so they never have to touch a piece of paper or the device screen during their picking flow.

Automate Bin Locations

Scanco Warehouse 100 will give you the next level of tracking your inventory in bin locations. Have the peace of mind knowing exactly where your inventory is within your warehouse.
