# Enhanced Scheduling for Operations Management (fka JobOps/Sage 100c Manufacturing)

- **Class Dates:** Wednesday, July 8 and Thursday, July 9  
12:00pm – 4:30pm Eastern Daily  
( 2 – ½ day sessions)
- **Class Price:** \$595 per student
- **Class Prerequisites:**
  - **Partners** – Must have previously taken the Base Operations Management course (Base JobOps & TimeTracker)
  - **End-Users** – Must have a good knowledge of base Operations Management to take the course. Specific items that must be understood:
    - Work Ticket Class Maintenance
    - Activity Code Maintenance
    - Work Ticket Template Maintenance
    - Status Codes
- **Class Description:**
  - Enhanced Scheduling is a capacity planning scheduling tool for your manufacturing resources. This course covers three types of scheduling: Date Base, Infinite Capacity, and Finite Capacity. It also addresses the tools available within Enhanced Scheduling to manage the manufacturing floor schedule and work tickets.
- **Class Details:**
  - The class is conducted via GoToWebinar. Once your registration is paid, you will receive a link for your personal access to the class.
  - A Training Manual is provided in PDF format for your use with the course.
  - A Sage 100 image is provided that includes the software needed to complete the activities and to interact with the software on your own workstation.
