Convious Reseller Module

convious

With the **Convious Reseller Module**, you can add all your offline resellers to your Convious Control Panel to have **<u>one central place</u>** for order management and customer acquisition while distributing your tickets at more locations.

↓

➜ **Create and manage reseller accounts** straight from your Control Panel and always keep an overview of all resellers and their performance.

➜ **Track sales**
Keep the overview of your reseller channels and performance metrics in your Control Panel.

➜ **Get digestible insights**
Find easy to understand reports about your resellers' performance and export the items sold by your resellers.

➜ **Invoice your resellers**
As your agreement with your reseller is independent from us, you will have to take care of the proper invoicing.

Get in touch with me for more information and I'll be happy to walk you through how the **Convious Reseller Module** can work with your venue!
