

If you train your horses on tracks with finish lines, our team offers to personalise your experience by adding to your track the GPS coordinates of the finish lines. Doing so, they will be automatically detected as soon as a horse crosses them.

### Layout on the map and graphics

Find out your finish line on the training map and on the graphics. You have the possibility to analyse the response of the horse around the finish line : did he maintain the effort until the end ? Is his speed dropping once he crossed it ?

### Split times layout and calculation

If a finish line is detected on a training, the calculation of split times will be adjusted in order to end on the finish line. You then have the accurate last 200 meters before the finish line, or the last 400 meters, etc.

In order not to display the calculation according to the finish line, you can hide it by removing the tick located on top of the map.

☒ CALCULER DEPUIS LA LIGNE D'ARRIVÉE

155	00:18.0	31.0	184	1.2	4.4	2.27
200	00:20.0	36.0	184	-0.5	4.7	2.21
200	00:28.0	23.7	162	-1.0	3.6	1.94
200	00:32.0	22.5	146	-0.2	3.2	1.89
200	00:29.0	24.8	168	0.1	3.7	1.93
200	00:23.6	30.4	181	0.9	4.0	2.02
200	00:14.3	50.2	200	1.2	5.7	2.40
200	00:12.3	58.4	204	1.5	6.3	2.58
200	00:12.3	58.4	200	-0.3	6.5	2.53
200 - Finish	00:13.3	54.0	210	-0.3	6.2	2.44
200	00:15.5	46.5	210	-1.1	5.7	2.30
200	00:24.5	29.4	201	-1.3	4.2	2.03
30	00:06.0	18.0	181	-0.5	2.4	1.80

### Multiple Finish Lines

Some of our trainers work with multiple finish lines according to the trainings. You can, in fact, put as much finish line as you want. At the end of the training, the Equimetre platform will automatically detect which finish line to use by choosing the one who has been crossed the faster.

### How to add a Finish Line

Please contact a salesperson or simply send an email to [help@arioneo.com](mailto:help@arioneo.com). To add a finish line, we need 2 GPS coordinates (on each side of the line). A GPS coordinate is composed of 2 data : one is longitude, the other is latitude.

#### GET YOUR FINISH LINE GPS COORDINATES STEP BY STEP

Use the Map app on your smartphone, go to settings by clicking on 'i' and select the satellite mode.

When selecting a point on the map, Map gives you both coordinates corresponding to the GPS coordinate of the finish line.

For more precision, you can go physically on the exact point of your finish line, click on the point indicating your position, select 'mark my position' and report the GPS coordinate of the finish line to our team following the same steps.
