# ActiveGuard® Mattress Liners

## FEATURES

- **ActiveGuard® Mattress Liners** are the only EPA-registered proactive strategy for preventing a potential bed bug infestation before it establishes.
- **Superior to any other bed covering alternative**, ActiveGuard® helps protect your customer and bedding assets by actually killing bed bugs including resistant strains.
- **The only bedding product** to provide active 24/7 protection against bed bugs for two years.
- **Cutting edge research** demonstrates that within only 10 minutes of contact, bed bugs do not feed and females do not drop their eggs, resulting in fewer bites and preventing infestations before they establish.
- **Kill bed bugs and dust mites continuously** for up to two years providing protection against any adult, juvenile or bed bug eggs that may be introduced into a bed.
- **Extensively lab and field tested**, ActiveGuard®'s dust mite killing ability helps provide a hypo-allergenic bedding environment.
- **The perfect solution** when implementing a treatment or preventive strategy against bed bugs.
- **Thin and breathable**, these liners are easily installed onto mattresses and box springs in less than one minute.
- **Effective** when installed over encasements and under mattress pads.
- **Available in four sizes** that fit most mattresses and box springs; even on California king-sized and XL mattresses.
- **Never needs repair** for rips or tears; continues to work even if torn.
- **Maintenance-free** and is fire-retardant.
- **Made from strong polyester netting**, ActiveGuard® is odorless, quiet and comfortable to sleep on.
