Supply Chain Consulting Services

Supply Chain Consulting Services for distressed mid-market companies to reduce costs, protect cash, and reduce risk.

Recent Client Engagement

We were brought into help a distressed mid-market oil & gas client that needed to reduce capex and improve operational efficiency across multiple business units.

Consulting Solution

We evaluated critical spend categories, created and executed and optimized sourcing strategy, deployed supply chain risk management, and leveraged our proprietary technology.

Result

23% capex reduction in less than 60 days

Industries Served

Oil & gas, industrial manufacturing, energy, construction, services, water/wastewater, other industrial

Who We Work With

CEOs, CFOs, Chief Restructuring Officers, boards, private equity firms, lenders, restructuring advisors, accounting firms and other trusted advisors

Our Process

1. We rapidly capture and analyze data to create a plan.
2. We execute cost, working capital, and supply chain risk reduction programs by negotiating with current suppliers, eliminate sole sourcing and instantly sourcing new prequalified suppliers.
3. We automate manual procurement processes to reduce fixed overhead costs.
4. We track results to assure that you are getting savings and we provide ongoing reporting to stakeholders.

Client Benefits

- CEOs/CROs get a comprehensive plan to reduce costs and conserve cash to take to their boards or lenders
- Clients get lower costs, reduced working capital and reduced risk
- Clients can achieve cost reduction objectives to continue to operate while avoiding cutting other critical business activities that could negatively impact future business potential

We can deploy our consultants in days and deliver results within weeks. Contact us to learn more.
