# Warm Commerce

Supply Chain Management and Sourcing Solutions

Warm Commerce provides everything you need to successfully optimize your supply chain for cost, risk, diversity, and performance.

Understand supply chain risk with supplier operational status, centralized supplier risk and compliance information, on-boarding documentation, and more.

Improve supply chain performance and reduce risk with performance management tools including supplier ratings and feedback, KPI management, Approved Vendor Lists, and centralized contract and document management.

Reduce costs and improve resiliency by searching our pre-qualified supplier discovery network with more than 1000 categories.

Sourcing tools to **easily create and execute competitive bids** with current and new suppliers.

Operate leanly by leveraging our sourcing services to help find, qualify, source, on-board and other supplier related tasks.

Warm Commerce software, automation, and services **frees you up to focus on the highest value creating activities** by managing supplier-related administrative tasks without needing to replace your existing procurement system.

Find new technologies, products and other solutions to **improve operational results**.

Achieve corporate objectives including cost reduction, risk reduction (eliminate sole-sourced vendors, supply chain near-shoring, etc.), implementing ESG programs, increase local and diversity supplier sourcing, and more.

Diversity Owned Business Sourcing

- **Support your local community by implementing Diversity Owned Business sourcing program for your organization**
- **Connect with 100+ highly qualified Diversity Owned Businesses on the Warm Commerce network including MBE, WBE, HUB, veteran owned/service-disabled veteran owned, LBGTQ owned businesses, more**
- **Easily track and report on Diversity Owned Business spend**

Warm Commerce deploys in days, integrates with existing systems, and doesn't require replacement of procurement or financial system.
