QUESTIONS TO ASK WHEN CHOOSING A MACHINE

All New Tech Machinery roof panel machines come with your choice of one panel profile and choice of rib rollers, polyurethane drive rollers, and a limited three-year parts warranty.

PRICING / COST

- ✓ What is the machine's starting price?
- ✓ How much is a machine with the configuration and/or accessories I need?
- ✓ Is the machine I want within my budget?
- ✓ What are the basic features I need to run a machine?

MACHINE SPECS / FUNCTIONS

- ✓ Is the machine designed for residential and/or commercial projects?
- ✓ How long is the machine?
- ✓ How much does the machine weigh?
- ✓ How fast can the machine produce panels?
- ✓ What panel widths can the machine produce?
- ✓ What material types can be run through the machine?
- ✓ Does the machine have automated functionality (hydraulically-driven components like shears, rollers, or controllers)?

ROOF PANEL PROFILE OPTIONS

- ✓ How many profile styles are available with this machine?
- ✓ Do any of these profile options fit with what I'd like to offer customers?
- ✓ Does the machine have the capability to grow with my business in the future? Is it capable of producing commercial profiles if desired later?
- ✓ Does the machine offer more than just roof panel profiles (wall, specialty, etc.)?
- ✓ Are any additional profile options available?

ADD-ONS / ACCESSORIES

- ✓ Does the machine offer a computer controller based on my needs (automatic controller or batch and length)?
- ✓ Does the machine have the add-on options I need for my business operation?
- ✓ Does the machine have modular power available (changing from one power source to another easily)?
- ✓ What features come standard with the machine and which are optional for an additional cost?

Field-formed panels meet compliance with UL580, Class 90 (machine must be registered with UL to qualify).
