

Teamwork Assessment Workshop

Unlock the power of Microsoft Teams and Atlas digital workspace as the hub for teamwork and knowledge sharing

Improve collaboration and communication across your organization

Organisations are **5X more likely to be high performing** after investing in teamwork services. They see increased efficiency as teams share files and collaborate on documents in real time; greater flexibility as ad-hoc teams come together; increased knowledge sharing; and enhanced security as collaboration moves from disconnected systems to a unified platform for teamwork. For these organisations, providing enhanced knowledge capture and sharing is route to transforming productivity.

This Microsoft 365 Teamwork Assessment introduces you to new ways to work better together, highlighting tools and resources that facilitate your employees to collaborate effectively and share information securely no matter where they work.

Teamwork Assessment Workshop

Introducing the Teamwork Assessments Workshop – it will allow you to evaluate your environments, determine the individual scenarios that apply, and deliver the appropriate workshop modules (Solutions, and Adoption & Change Management) to result in a customized roadmap for your ideal solutions.

Assess

Gather information on current environment and business challenges

Art of the possible

Identify and prioritize teamwork and knowledge sharing use case scenarios

Build the plan

Build the plan to deploy and adopt Microsoft Teams and Atlas

Workshop Deliverables:

- In-depth evaluation of existing collaboration/communication tools, and explore business priorities and IT readiness
- Immersive experience that tackles a specific need or use case to illustrate what is possible with Microsoft 365 teamwork services
- Actionable roadmap for implementing teamwork solutions.
