

WORKFORCE EDUCATION & TRAINING

Through a diverse set of programs and collaborations, Franklin Energy educates the workforce and provides communities with access to education, training, services and support to improve competitiveness and find quality jobs in a clean energy economy.

Workforce Education & Training

Enabling Communities Through Long-Term Growth

Franklin Energy supports the training and educational needs of local communities while helping the nation achieve its full energy efficiency potential. Through workforce education & training, we provide utilities with a well-trained, highly skilled workforce while developing an industry of qualified contractors and workers prepared to deliver long-term market transformation.

INCREASED EQUITY

Our workforce education & training focus is on increasing equity in energy efficiency programs and serving disadvantaged communities and hard-to-reach customers through engaging content that is built upon sound adult learning principles.

Building Clean Communities

We engage residents from local communities and provide the education and skills they need to ensure energy-efficient equipment is properly installed, commissioned and maintained, and that buildings are designed, constructed and retrofitted consistently with best practices and technical specifications for efficiency.

Educational Expertise

We design and deliver innovative education offerings for a variety of audiences and subject areas in multiple formats to meet the needs of diverse communities. From training building professionals on the fundamentals of green building science to educating students on electrification and healthy homes, Franklin Energy engages the workforce in tomorrow's careers, today.

Collaborative Solutions

Through an extensive network and collaborative connections, our educational solutions provide the resources necessary to achieve energy efficiency and demand-side management potential through a fully trained and engaged workforce.
