

# **CAMUNDA**

---

## **Automate any Process, Anywhere**

Reinventing Process Automation  
for the Digital Enterprise

Bob Prichard, Camunda

# Process Automation Expectations

Legacy roadblocks limit solutions and business agility

- Technology
- Infrastructure
- Organization

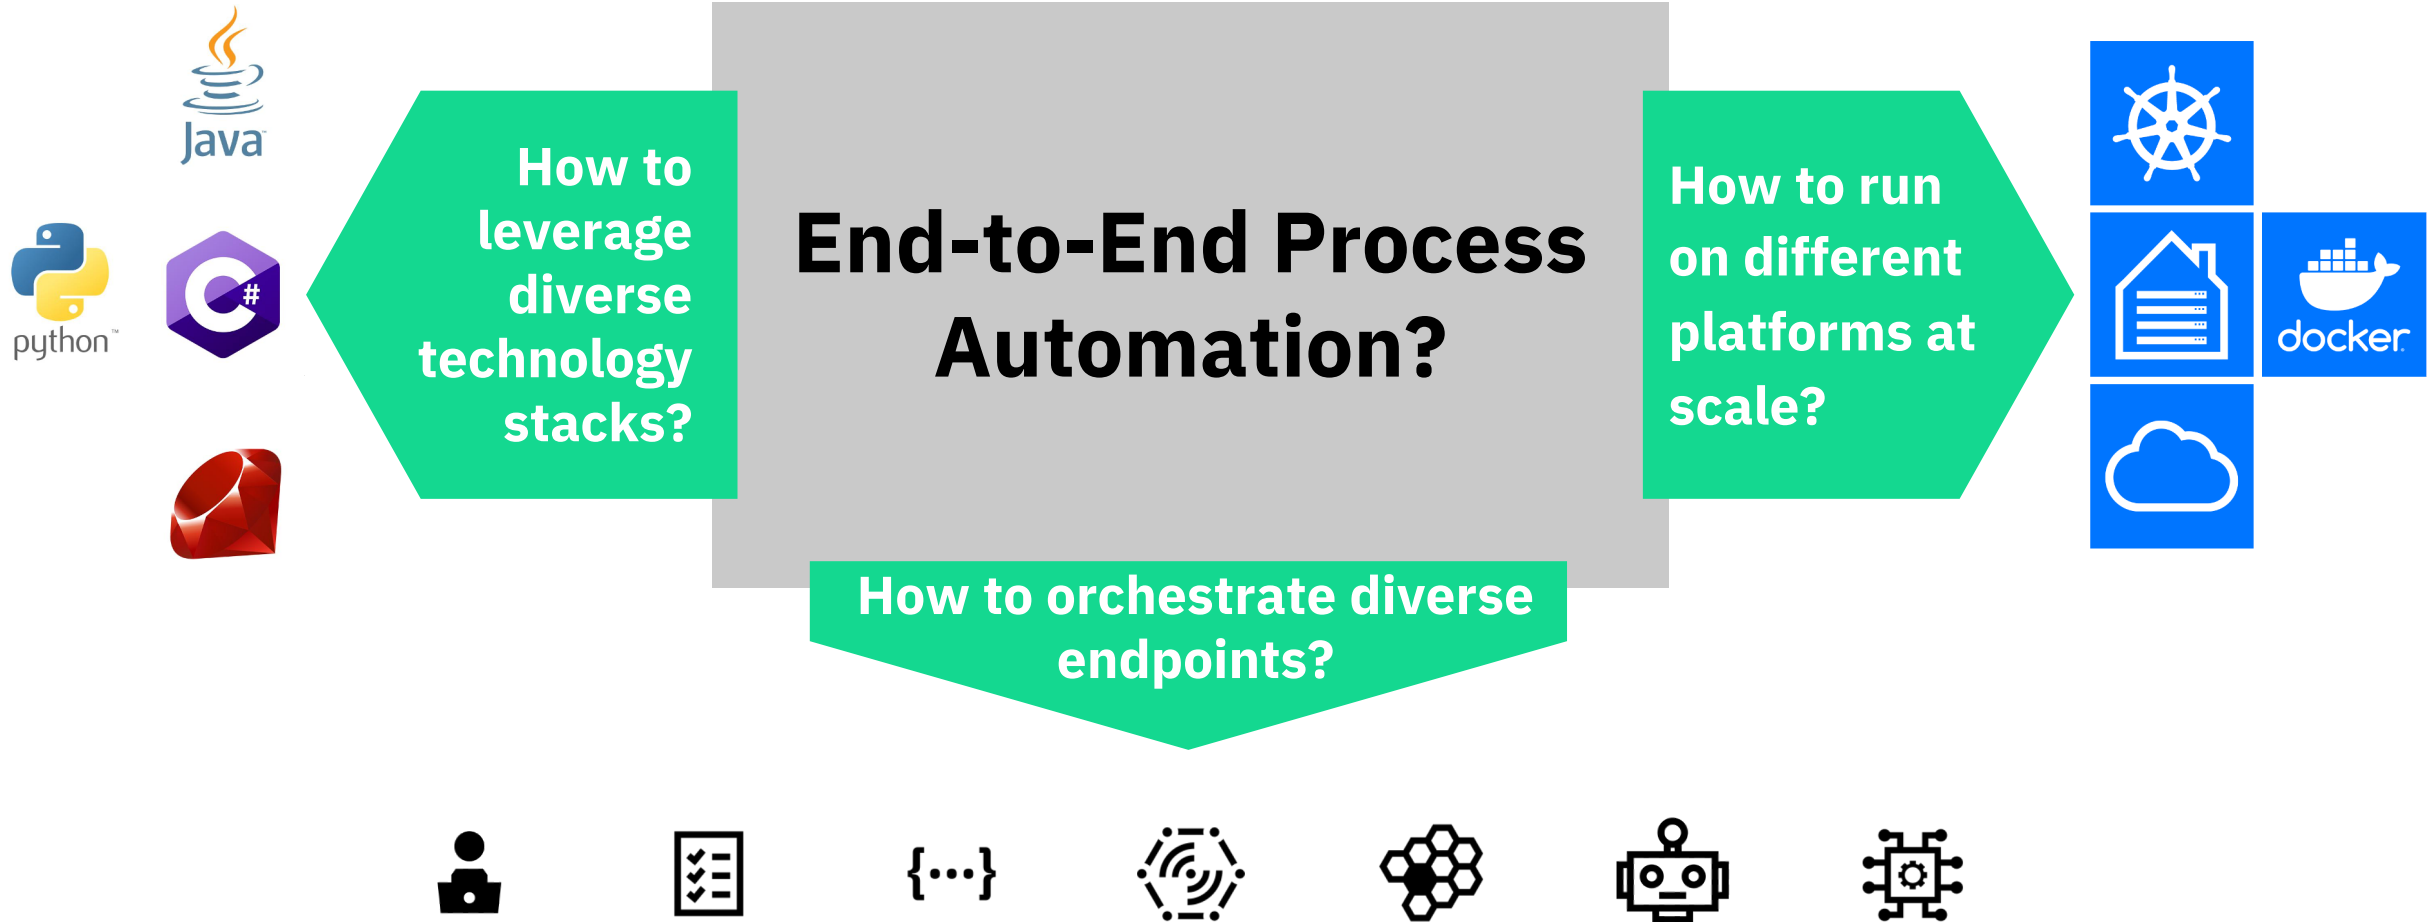

Source: "State of Process Automation 2020" Report. n = 400 IT decision makers involved in process automation and process automation professionals in North America and Europe.

1 - Question: To what extent do you agree or disagree with the following statement: "Process automation is a vital element of digital transformation"?

2 - Question: "Which of the following components are included as part of a typical process automation implementation within your organization"?

3 - Question: "What best describes the infrastructure used for these various process automation components in your organization"?

# The Process Automation Challenge

# Our Vision

# **CAMUNDA**

Automate Any Process, Anywhere

# Camunda Advantage

## Traditional Approach

Isolated Implementation

Proprietary

Tough to Install & Extend

Blackbox Monoliths

Expensive

## Camunda Approach

End-to-End Orchestration

Standards-based Collaboration

Developer-Friendly

Open Architecture

Cost-Effective

# Benefits to your Business

## End-to-End Orchestration

Drive open, flexible and scalable orchestration across any endpoint, person or system

## Standards-based Collaboration

Use the power of BPMN and DMN as a common language for Business and IT throughout the entire lifecycle of your process automation initiative

## Developer-Friendly

Open technology, designed for excellent developer experience, fits into dev environments, 100,000+ global developer community

## Open Architecture

Lightweight and highly scalable, easily integrated with any architecture or framework, optimized for high volume and complex processes

## Cost-Effective

Easy to get started, no proprietary expertise needed, get to results quickly, easy to change and maintain

Better customer experiences

Faster time-to-value

Higher business agility

Increased operational efficiency

# About Camunda

Camunda innovates process automation with a developer-friendly approach that is standards-based, highly scalable and collaborative for business & IT

# Technical Use Cases

Any process automation solution is based on one or more of these technical use cases:

**(Micro-)services  
Orchestration**

**Human Workflow  
Management**

**RPA Bot  
Orchestration**

**Decision  
Automation**

# IT Initiatives

Camunda projects often happen in context of these IT initiatives in order to drive digital transformation:

**Replace Homegrown  
Workflow Solutions**

**Replace Legacy BPM  
Systems**

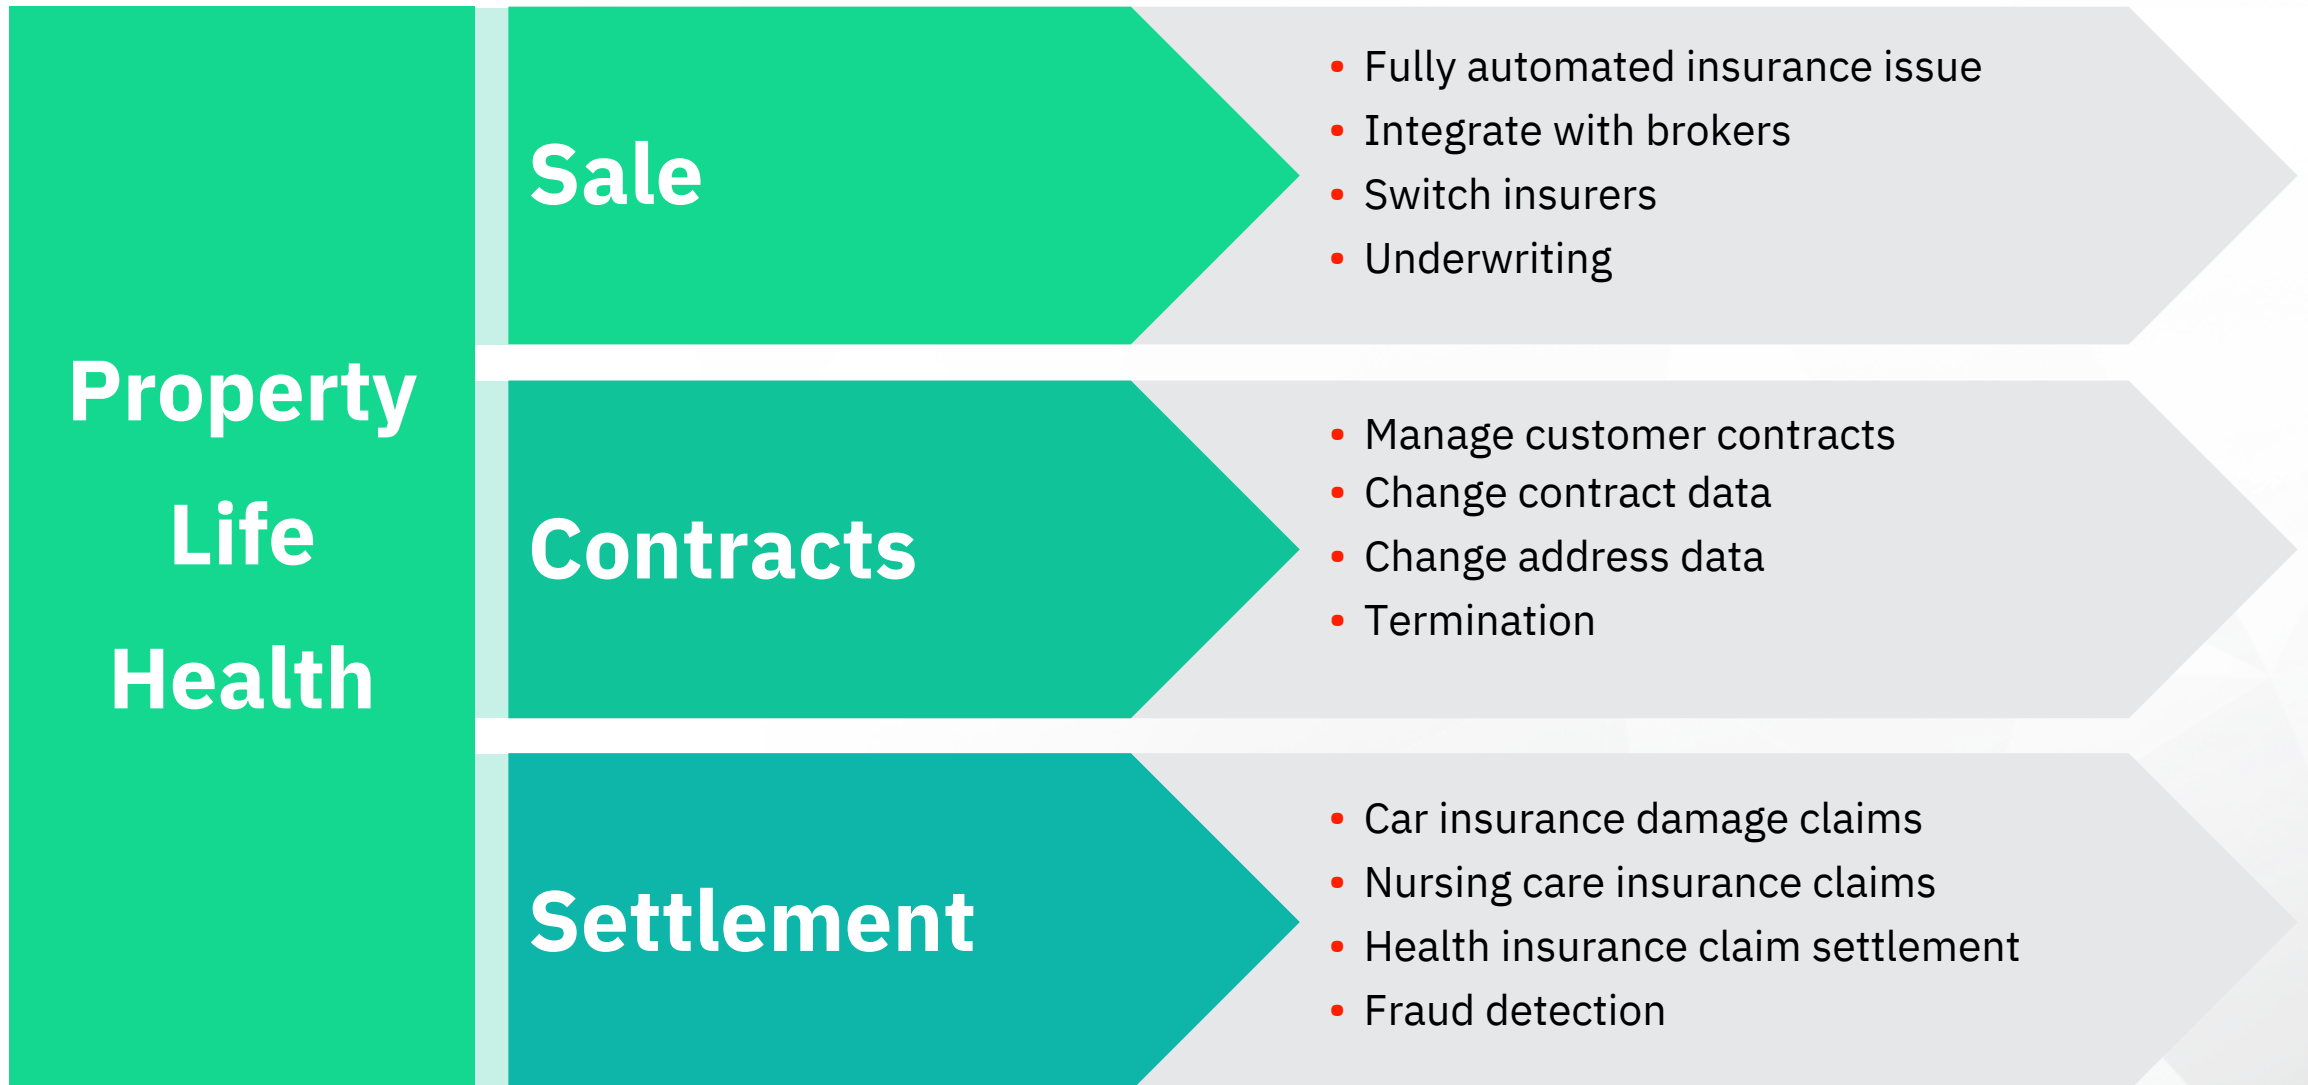

**Centralize Process  
Automation Platform**

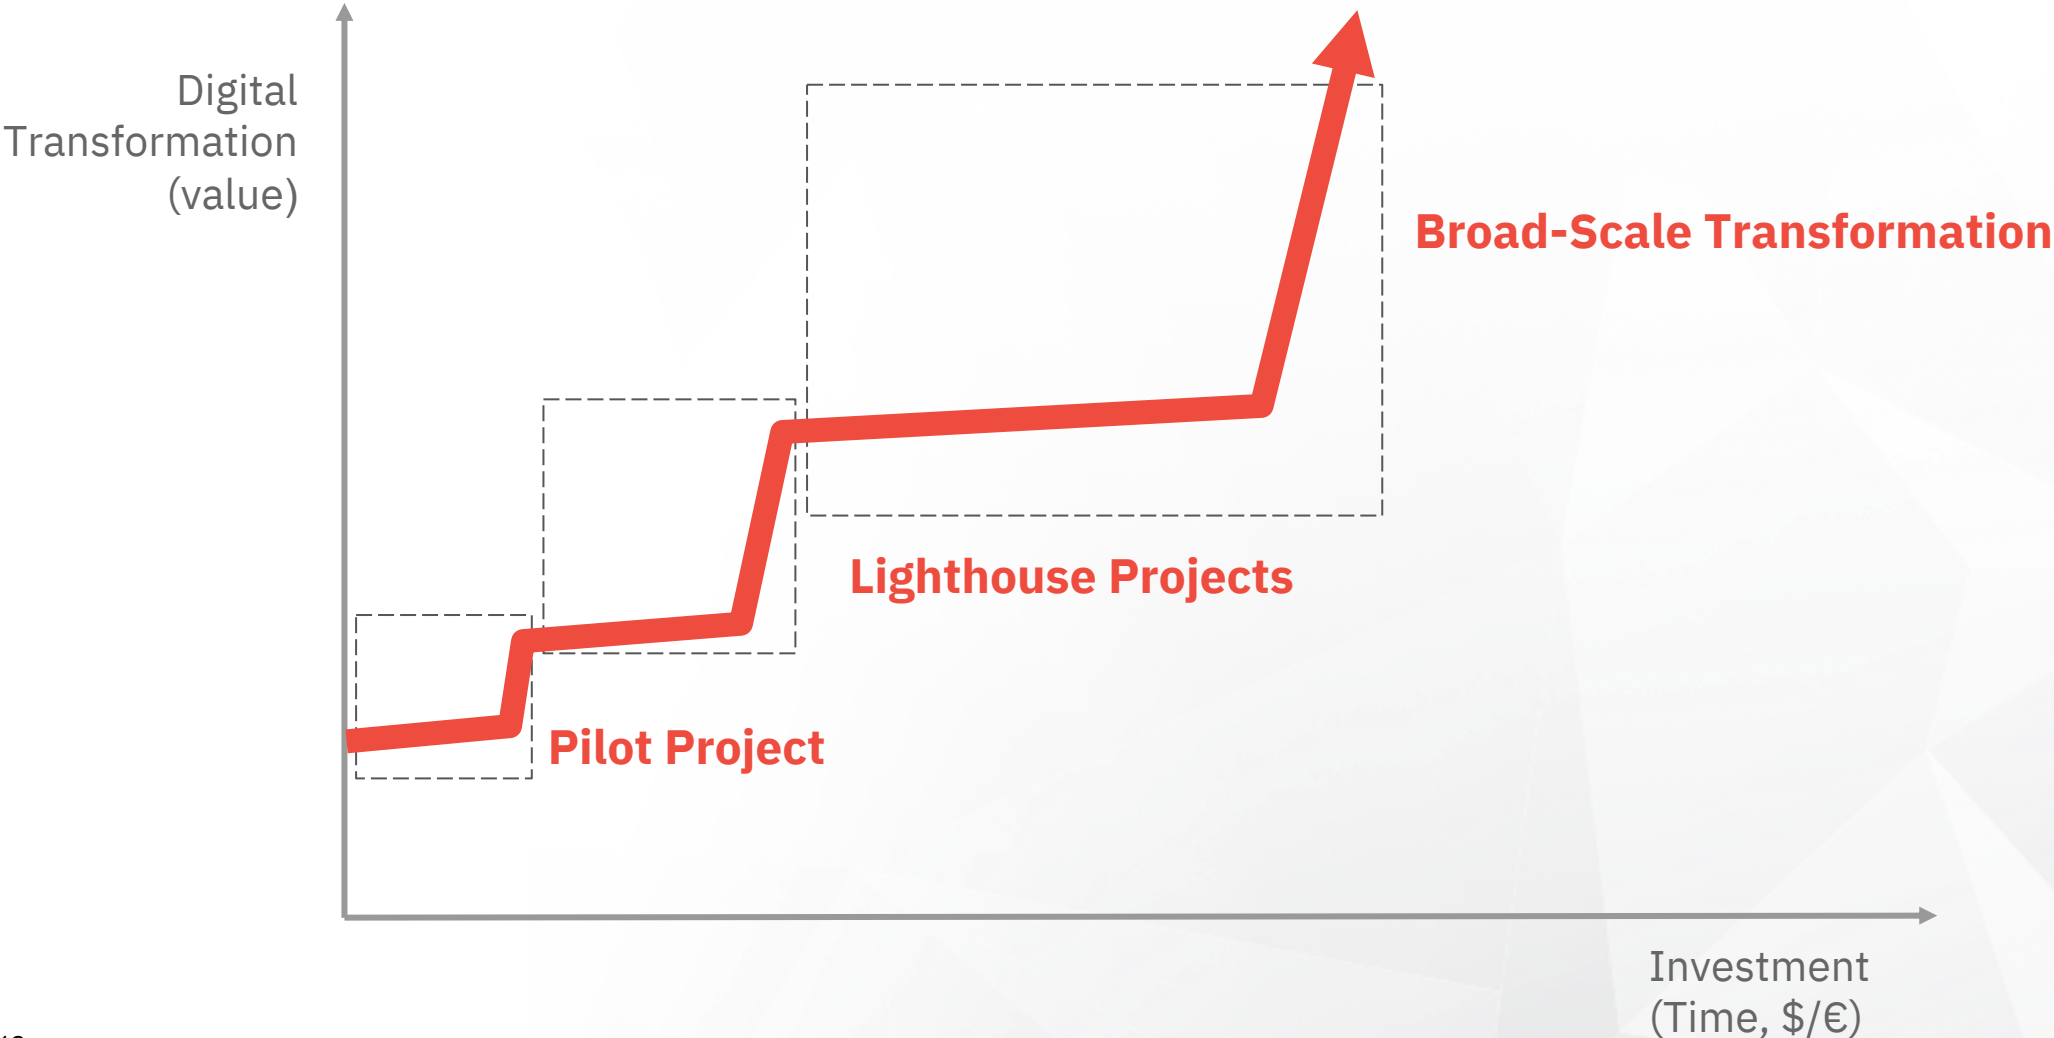

**Move to  
the Cloud**
