11 Reasons You Want Camunda Platform 7 Enterprise Edition

Take the next step in your process automation journey and get the Enterprise Edition of Camunda Platform 7.

1	**End-to-end Process Data Analysis:** Visualize and analyze processes from start to finish, so you can improve performance and identify bottlenecks — even including processes that weren't executed by Camunda Platform 7.
2	**Real-time Process Updates:** Update processes quickly and easily by migrating running instances to new process definitions without downtime and with a complete audit trail.
3	**Shareable, Reusable Templates:** Bring IT and business users together to collaborate on reusable components that can be shared across projects and teams, with real-time syncing between web-based and desktop modeling tools.
4	**Enterprise-grade Support:** Count on priority response times from our Technical Support team, with optional 24/7/365 availability.
5	**Regular Priority Patches:** Gain immediate access to patch releases that fix product bugs and security vulnerabilities, plus free hotfixes for critical issues.
6	**Role-based Training:** Get up to speed on BPMN, DMN, and process modeling best practices with role-based training for software developers, enterprise architects, and DevOps teams.
7	**Enhanced Operational Management Tools:** Investigate, troubleshoot, and fix problems with processes and decision tables in real time, without disrupting end users' experience.
8	**Accelerated Root Cause Analysis:** Gain process transparency and history for all process instances based on time, state, retries, and which flows have the most activity.
9	**Out-of-the-box RPA Bot Management:** Ensure RPA is part of your end-to-end automation strategy by using built-in integrations with popular RPA tools and leveraging the power of the BPMN process modeling standard.
10	**Detailed Audit Logs:** Use powerful operational logging to answer critical questions such as: Who did what? Which operation was performed and when? What changes were made?
11	**Expert Architecture Reviews:** Start your projects off right with an architecture review by Camunda experts, complete with suggestions for ways to streamline and enhance your process models and decision tables.
