# Products To Support For Billing Engine

## Track and Support

 **Jira Software**

Issue tracking and code integration

 **Jira Service Management**

IT support and self-service

 **Jira Work Management**

Project management for business teams

**Capture for Jira**

Exploratory testing

 **Statuspage**

Communicate downtime

## Apps

 **ATLASSIAN** Marketplace

Apps for our products

## Training

 **ATLASSIAN** University

Training and Certification

## Collaborate

 **Confluence**

Create & collaborate

**Questions for Confluence**

Share knowledge

## Enterprise

 **Crowd**

Identity management

**Premier Support**

Account-level coverage

**Priority Support**

Flexible coverage

**Technical Account Management**

Trusted advisors

## Code

 **Bitbucket**

Git-based code collaboration and management

## Code Quality

 **Bamboo**

Continuous integration

 **Fisheye**

Browse & search code

 **Crucible**

Peer code review

# Legacy Billing Engine

# Reverse Engineering from Code

Business flow drafted by reverse engineering of the code

Workflow based implementation

Sequencing problem needs to be solved

Multiple failure points as part of integration

Complex workflow and need agility as part of implementation

BSA managed business rules.

Camunda Operational Benefits

### Why to use BPMN?

- ✓ Simplicity
- ✓ Agility
- ✓ Speed

### Where to use BPMN in Finance?

- ✓ Specific Sequences to follow such as Invoice, Credit Memo, Vendor Bill, Refund, Payment, Sale Actions

### What are the benefits ?

- ✓ Business process automation
- ✓ Visual presentation about the business logic
- ✓ Quick start for developers to build new functionality
- ✓ Operational excellence

DMN Use case

Camunda Operational Benefits

## Why to use DMN ?

- ✓ Decision modeling
- ✓ Business analysts can model the rules
- ✓ Independently unit tested
- ✓ Hot Deployment/changes in production.

## Where to use DMN in Finance ?

- ✓ Use cases as below :
  - ☐ Tax Code management
  - ☐ New Product Initiative (NPI)
  - ☐ Contract Modification Flag
  - ☐ Deciding Region
  - ☐ Deciding Discount Type
  - ☐ Sale Action Type
- ✓ Easy to replace DMN functionalities to micro-services to manage it for longer term

## What are the benefits ?

- ✓ Clear decision logic
- ✓ Simple Spreadsheets can be replaced with DMN
- ✓ Agility on new/modified changes

### Camunda Operational Benefits

# Camunda: Operational Benefits

## New Product Initiative

- No code changes required (managed by DMN table)
- Limited / No UAT
- Replace DMN with REST API once functionality is available to manage centralize Pricing and Product API available.

## Transaction Artifacts

- Sequence-based
- Retry implementation
- Camunda optimizer reporting

## Tax Code Related Mappings

- Decoupled architecture
- Integrated tax related mappings and business rules

## M&A Product Onboarding

- Simplify M&A product on-boarding
- Monthly/Quarterly/Yearly book closing
- Automated process in NetSuite.

Thank you !!
