

GDPR Reg Form Implementation Guide 2018

5 Step Form: Setting up the HTML

This guide outlines the implementation of the new GDPR Sign up form. Please delete the current (old) form code and assets from your site / site files and follow the steps below to implement the new GDPR compliant sign up form. There is an example at the end of the HTML section in this guide that shows the entire form code as it should look once implemented.

1. Five Step Form Code

This is the 5 Step Form code:

```
<!-- 5 Step Form -->
<div class="signup">
  <div class="signup__form">
    <div data-wld-component="signup">
      </div>
    </div>
  </div>
</div>
```

2. The Form Styling (CSS)

Link the stylesheet:

```
<link rel="stylesheet" href="css/form-jq-toggle.css">
```

5 Step Form: Setting up the HTML

3. JavaScript snippet

Add in the javascript snippet and please remember to update the 'xxxxx' with your site id.

```
<script>
(function(w,l,d,j){w.WLD={handlers:[],ready:function(fn){WLD.handlers.push(fn)}}
var a=l.createElement(d),m=l.getElementsByTagName(d)[0]
a.async=1,a.src=j,m.parentNode.insertBefore(a,m)})(window,document,"script","https://s.wldcdn.net/api/snippets/js/signup/xxxxx")
</script>
```

4. Multi-Step Form code

Add in the multi-step decorator code:

```
<!-- Load the multi-step decorator -->
<script src="js/multi-step-jq-toggle.js"></script>
<script>
WLD.ready(function() {
  $('#signup__form form').multiStepForm();
});
</script>
```

5. Reference the jQuery library

Your site might already have jQuery referenced, but the new form should also work with older versions of jQuery. Please check though.

```
<script src="https://cdnjs.cloudflare.com/ajax/libs/jquery/3.3.1/jquery.min.js"></script>
```

5 Step Form: Setting up the HTML

Here is an example of the entire form code as it should look once implemented correctly:

```
<!DOCTYPE html>
<html lang="en">
<head>
<title>GDPR Reg Form</title>
<meta charset="utf-8">
<meta name="viewport" content="width=device-width, initial-scale=1, user-scalable=no">
</head>
<body>

<!-- 5 Step Form -->
<div class="signup">
  <div class="signup__form">
    <div data-wld-component="signup">
    </div>
  </div>
</div>

<link rel="stylesheet" href="css/form-jq-toggle.css">

<script>
(function(w,l,d,j){w.WLD={handlers:[],ready:function(fn){WLD.handlers.push(fn)}}
var a=l.createElement(d),m=l.getElementsByTagName(d)[0]
a.async=1,a.src=j,m.parentNode.insertBefore(a,m)})(window,document,"script","https://s.wldcdn.net/api/snippets/js/signup/xxxxx")
</script>

<script src="https://cdnjs.cloudflare.com/ajax/libs/jquery/3.3.1/jquery.min.js"></script>

<!-- Load the multi-step decorator -->
<script src="js/multi-step-jq-toggle.js"></script>
<script>
  WLD.ready(function() {
    $(''.signup__form form').multiStepForm();
  });
</script>

</body>
</html>
```

5 Step Form: Styling and Files

This form is fully responsive and caters for both desktop and mobile. We have supplied standard styling for this new form, but feel free to further customise the css, if need be. The external .css, image and .js files are in their relevant folders (css, img and js) in the zipped up site files. Please ensure you place these external files into the correct folders in your site. However, if your site files follow a different folder structure and you are placing the new form files into different folders, then please ensure to update the file paths in the index.html so they match up.
