

Dear Customer,

Happy New Year and thank you for your continued support!

As you know, 2021 is a brave new world for most of us, both professionally and personally. Navigating change on such a large scale can be challenging, but we have some good news to tell you. Over the past two years, Creative Pultrusions and our four other composite companies have been working to launch a new organization that is uniquely equipped to take you and your business into the future. You may recognize their names: E.T. Techtonics, Kenway Composites, Tower Tech and Composite Advantage. We have combined the composite products, manufacturing capabilities, field experience and engineering strengths of these companies to give you one source for all your composite needs.

Let me introduce you to Creative Composites Group (CCG). By pooling this knowledge, we have created an entity that is creative, inventive, and collaborative at a level above what we were able to do individually. The best part is that you will not have to make any changes on your end. You will continue to do business with these legacy companies just as you always have done in the past.

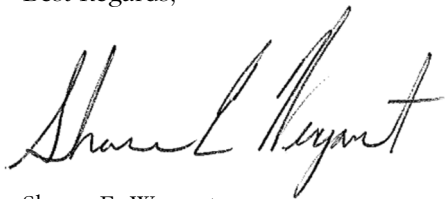

So, what does this really mean for you? Well, how big are your ideas? Can you think of a product or application that will benefit from FRP composites? We have the technologies, skills and expertise to create components or structures of any size or shape. If the technology does not yet exist, we will push the limits until we arrive at a solution.

We are in an era when the demand for ultra-light, super durable, corrosion resistant material has brought FRP composites into mainstream markets as the manufacturing and construction material of choice. We will help you take advantage of this.

We have also launched a new website at www.creativecompositesgroup.com to give you more information on all the products and services we offer. CCG may be new, but we have a long track record for performance.

We look forward to continuing to work with your company into the future.

Best Regards,

Shane E. Weyant
Chairman / CEO
Creative Composites Group
