

THE BEST WAY TO

INCREASE YOUR PROFITS... INCREASE YOUR MARGINS!

Did you know that increasing your margins by as little as 3% could be the equivalent of growing your business by more than 40%?

=

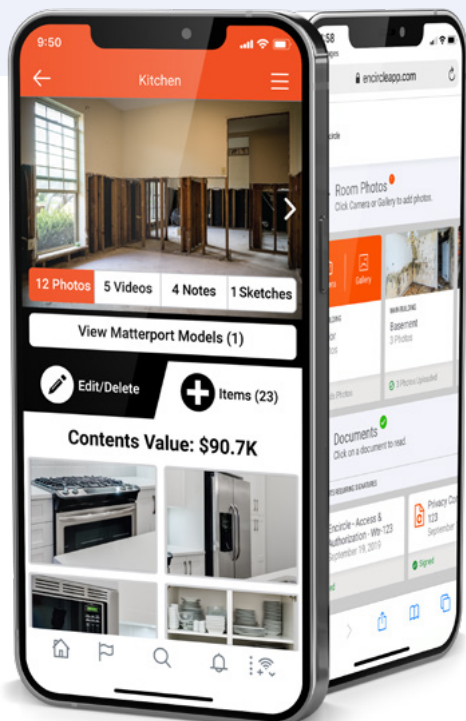

Steve runs a restoration business. It makes \$3 million a year in revenue with a 7% margin. At the end of the year, Steve makes about \$210,000 in net profit.

What if Steve could find an extra 3% in margins by improving his processes and capturing more line items?

If Steve increases his margins by 3%, he makes an additional \$90,000 a year.

To make an extra \$90,000 without changing his processes or increasing his margins, Steve would have to find the equivalent of an additional \$1,285,714.29 in revenue each year! That would be growing his business by more than 40%!
