Asset Inventory Management Storage Solutions for Education

The ways we teach and learn are changing, and the classroom has to follow suit! When you're returning to the classroom and finding that some furniture simply doesn't fit with current needs, Asset Inventory Management (AIM) is the perfect solution.

Easy, Safe and Accessible Storage Solution!

Our **technology-driven storage system** allows you to keep desks and chairs by storing what you don't need right now in our **secure storage facilities**, giving you 24/7 access to the system with **up-to-date information** and seamlessly returning it when the time comes!

Rather than selling off or donating pieces only to have to re-purchase classroom furniture down the road, store your pieces now to **save money, time, and headaches** later!

How We Can Help

Our AIM service lets you keep track of everything wherever you are, protecting your furniture for you and getting it out of the way while you temporarily change your classroom to better safely suit students' needs.
