Best Self-Service Excel®-Based Reporting For Epicor Systems

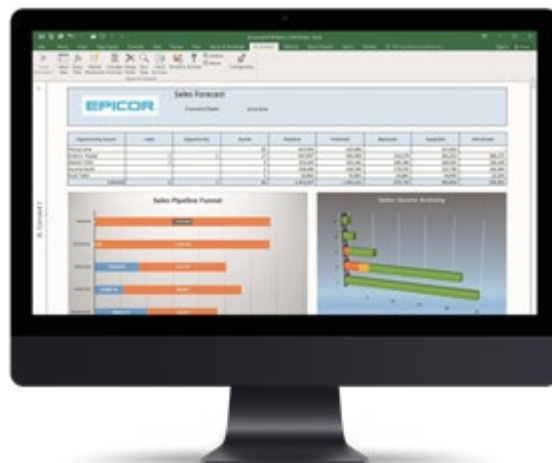

Epicor XL Connect 7 is a self-service reporting and analytics solution nested in the user-friendly environment of Microsoft® Excel®. The built-in query tool and drag-and-drop interface solves the universal problem of relying on others to create customized reports. It works with your Epicor and Microsoft Excel data sources and includes intuitive features that allow business users to answer many of their own questions. For the analysts, XL Connect 7 means that manual and ad hoc reports can be automated in a matter of minutes—saving time for more critical activities.

Epicor XL Connect 7 makes it easy for users to create and refresh information in Excel. Combining Epicor data with additional lookup and calculations, you get the answers you need without the usual challenges of gathering and refreshing the data sources.

The perfect solution for both the analyst and the business user, XL Connect 7 is a game changer in the way you and your company manage reporting. Build reports in minutes, utilize templates, and create interactive reports for detailed drilldowns and analysis from existing spreadsheets and Epicor data—all within Microsoft Excel.

Epicor XL Connect 7 includes enhanced data protection so you have peace of mind knowing your data is secure and that users can only access the data you want them to see.

User Types

Live user

- ▶ Full access to Epicor ERP data and can leverage multiple data sources
- ▶ Includes built-in features that automatically create pivot tables for detailed analysis
- ▶ Can package an arbitrary data set and distribute to remote users via PackNGo

Remote user

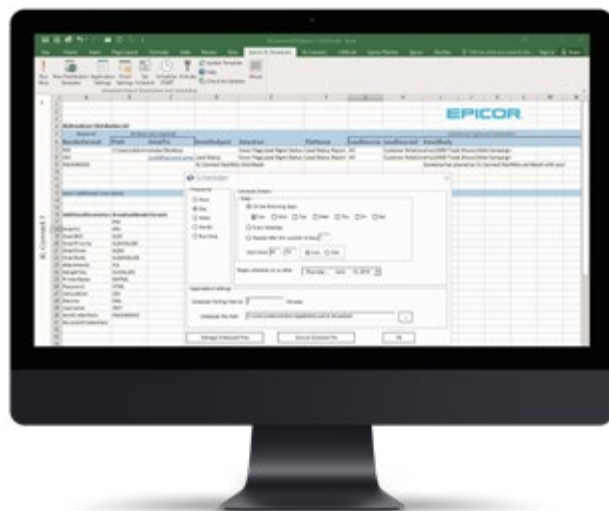

- ▶ Create their own ad-hoc reports, functions, and analysis based on data allowed to them
- ▶ Drill down and view the details behind the numbers
- ▶ Access data anytime, anywhere with fully interactive reports—even if offline

Broadcast Module

Nearly every organization uses Microsoft Excel to produce ad hoc and recurring reports and analysis. Then hours are spent distributing the right reports—or parts of reports—to the right people. The optional Broadcast module solves the distribution challenge by giving you the ability to automate delivery of specific information to specific users in all levels of your organization.

Broadcast delivery options include:

- ▶ Create multiple file formats, XLS/XLSX, PDF, XPS
- ▶ Email—Microsoft Outlook® client
- ▶ Email—SMTP server
- ▶ File Folder
- ▶ Microsoft SharePoint®—document library
