Top Epicor® User Experience Benefits

Technology is ever evolving. We're continuously innovating to deliver the modern and intuitive applications your business needs to stay competitive today and tomorrow. Discover the top user experience benefits you get when upgrading to the latest release.

1

Simplicity

Attract and retain talent with modern and intuitive applications that boost productivity and simplify everyday tasks. The Epicor Design System enables a simple and delightful user interface that provides a consistent experience across applications. Reduce training and user onboarding time with embedded guided learning and contextual education tools that enable users to learn as they go.

2

Mobility

Browser-based user experience that provides the mobility you need to keep your business running anytime, anywhere. No matter if you're visiting a client on the field, walking through the shop floor or sitting at your desk, you'll be able to easily access the system through the device and browser of your choice.

3

Connectivity

Enable connections between users, business workflows and processes. Extend technology beyond power users and incentive greater internal collaboration with solutions like Epicor Collaborate, Epicor IoT, and Epicor Virtual Agent.

4

Efficiency

Happy employees are more productive and engaged. Complete tasks in less time and optimize processes. Everything is easily accessible through the main menu and the Home Page can be personalized by user. Screens show the most relevant information and let you drill down into details with expandable panel cards as you need.

5

Tailored Experience

Create your own experience at a user or company level. We take system flexibility to the next level with Application Studio. Tailor applications with a best-practice approach in a low/no code environment, that is compatible with cloud and it's upgrade resilient.

Start your journey into great user experience today.
