

CONTRACT MANAGEMENT

ArrowStream Contract Management is a vital component to a restaurant's supply chain visibility that simplifies the management of supplier contracts and pricing data. As a central repository for supplier pricing agreements, Contract Management seamlessly integrates into a suite of customizable analysis tools and exception driven alerts, while enabling teams to:

- Prevent pricing errors & discrepancies
- Proactively manage expiring pricing
- Identify opportunities to optimize spend
- Reduce time & manual work managing contracts

KEY BENEFITS

- Simplified supplier contract & data management
- Faster retrieval of contract information
- Capture all negotiated pricing terms & components
- Central repository for supply chain teams & partners
- Streamlined partner collaboration
- Modern & intuitive interface

“With ArrowStream, our team benefits from a simplified process plus improves our ability to be proactive and strategic about managing contracts. In the end, we reduce our costs, optimize our spend, and save time, all from one place.”

- Ginny Michaels, Director Program Management
at SMS Cooperative

Supply Chain Visibility

CAPABILITIES

Central Repository

A centralized location ensures your supply chain team and partners can access and capture all negotiated pricing terms and components. Easily access details such as contract terms, attachments, notes, pricing down to freight bracket and contract-level freight data.

Global Search

Advanced search and filter capabilities allow users to quickly identify expiring and expired contracts plus more within the application. Simply get to your information quicker with typehead suggestions and custom column selection. With less clicks, teams save time and can better prioritize.

Automated Data Entry

More automation for administrative tasks reduces manual workload for teams. Speed up the process by simultaneously updating pricing for multiple items, copying freight details from one item to another and automating pricing communications.

Intuitive & Guided Interface

Intuitively designed to improve processes and prevent pricing entry errors and discrepancies, users can be confident that they're optimizing efficiencies and increasing accuracy. A guided user experience makes it simple when adding new contracts, and smart navigation allows users to easily maneuver contracts and add and update suppliers, items and shipping locations - all within one application.

Actionable Insights

Alerts and notifications promote proactive management by keeping your organization ahead of expiring pricing and guides users to take action so you can easily compare documented pricing against distributor systems to identify discrepancies before they happen.

Seamless Integrations

Contract Management seamlessly integrates into ArrowStream's suite of customizable analysis tools and exception driven alerts. By utilizing the application in conjunction with other tools, such as Supplier Pricing Portal, Contract Price Auditing and Strategic Sourcing, teams can obtain end-to-end supply chain visibility.

Analytics & Custom Reporting

Gain access to a powerful data mining tool that provides a virtually unlimited ability to customize reports or charts. Design the reports your organization needs or use the drill down functionality contained in ArrowStream to get to the root cause of any business issue.
