1000+
Distribution Centers

Streamline inbound logistics, collaborate with partners & enhance visibility across your supply chain

8000+
Food Suppliers

Work seamlessly with restaurant operators, respond to sourcing inquiries & grow your foodservice business

For Operators

BENEFITS + SOLUTIONS

Better manage your contracts and eliminate price discrepancies

With ArrowStream's Contract Price Audit, you can audit 100% of your contracted spend, and take a preemptive approach to eliminating price discrepancies by automating the examination of contract price updates and streamlining communication between you and your suppliers. Suppliers can seamlessly enter product pricing electronically, eliminating manual efforts and errors.

Increase contracted spend, and prevent stock-outs and obsolete inventory

ArrowStream's Supply Chain Visibility solutions keep watch on 100% of your spend, alerting you to opportunities to increase contracted spend and reduce instances of off-contract purchasing. Your inventory levels are also on display in every part of your network. See how much of each product your distributors have on-hand and on-order and create alerts when inventory levels are below emergency thresholds. Track product movement across your network to ensure on-time arrivals at the DC and prioritize issues.

“
I KNOW OF OTHERS WHO DO NOT HAVE ACCESS TO ARROWSTREAM & THE AMOUNT OF INVENTORY WRITE-OFF DURING COVID WAS ASTRONOMICAL FOR THEM. WITH ARROWSTREAM WE WERE ABLE TO JUMP ON ISSUES QUICKLY & MINIMIZE A LOT OF FINANCIAL RISK.
”

VP OF SUPPLY CHAIN AT COFFEE & BAGEL BRANDS

Quickly identify and resolve quality issues

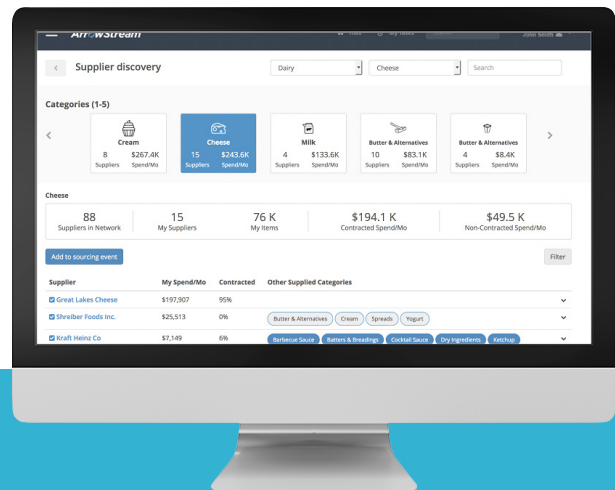

Protect your brand with Quality Incident Management by improving food quality and safety. Gain better visibility and control over store-level quality and service issues using our configurable workflow and supplier collaboration tool. Resolve issues more rapidly and recoup credits that you're owed. Quality analytics give you visibility into partner performance so you can catch issues before they spread.

Optimize your sourcing strategy

Combine your sourcing plan with data and insights from the ArrowStream platform with the Strategic Sourcing solution. Find new suppliers, send out anonymous inquiries, run sourcing events and use advanced tools to inform your decisions. Awarded product and supplier information flows seamlessly into ArrowStream for future contract management, price auditing and supplier collaboration.

Monitor markets and commodities that impact your product costs

Gain access to ArrowStream market data assets, such as comprehensive reports, analysis and forecasting on over 200 commodity markets. Use this data to better understand foodservice industry trends or identify trends that impact your product costs or pricing.
