- Extensive pricing configuration
- eCommerce integration
- Customer orders from alternative locations
- Mobile POS and mobile inventory
- Advanced analytics and AI
- Scalable architecture built for growth
- For retail and food service businesses
- Permission-controlled user setup
- Data migration tool

For retail and food service

Manage inventory. Send food to the kitchen display systems. Plan 3x2 offers, meal deals, and personalized discounts. Whether you are manage a café, a department store, or a chain of restaurants or hardware stores, LS One gives you the tools you need to succeed.

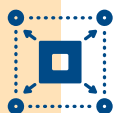

Integrate to your ERP system

Connect LS One to any finance or ERP system. The intelligent integration architecture makes it easy, and insures a seamless flow of data from the ERP to the POS system and back. Whether you use SAP Business One, Oracle, Microsoft Dynamics, or another ERP, LS One is the perfect POS for you.

Connect to your eCommerce

LS One easily integrates with any eCommerce platform. LS One processes all online transactions at your physical store, to ensure accuracy and decrease the risk of unaligned data.

Built for growth

LS One supports single- and multi-store environments. Add new terminals and stores to your setup easily and fast.

Advanced analytics

Find out your best selling items, busiest times of the day, sales per hour/staff/customer and more with LS One's rich suite of reports. Need more insights? Connect LS One to Microsoft Power BI with the free integration, and get AI-powered insights to drive your business forward.
