

Savanta: Essentials Concept Test

Determining the strengths, weaknesses and opportunities for optimizing new concept ideas to deliver in-market success

Introducing the Essentials range:

Essentials are a suite of research products that have been designed by our team of experts to offer a simple, cost effective alternative to answering your business objectives.

How it works

Savanta's team of NPD experts will design your questionnaire, having tested over 30,000 different concepts, ranging across many categories and markets.

We then simply need you to provide your concepts and clarify your audience, to ensure we can evaluate how the concept performs against your target customer. We will test each one amongst a matched audience using our online consumer panel.

Five key stages:

- Work with the Savanta team to adapt your questionnaire template
- Identify your target audience
- Survey in field
- Access online dashboard for results
- Identify the best performing concept

What you will understand:

Helping you to...

- Identify which concept is the best performing within as little as 24 hours
- Identify purchase intent across concepts
- Evaluate its Concept Potential Measure (CPM) score benchmarked against the competition
- Understand strengths and weaknesses of the concept/message/pack
- Include audience profile/targeting
- Validate the proposition to take forward to next stage of development
