1 Technical Bulletin#: TB-LD009 Revision Level: A

Title: Using Life Defender Gen 3 Tag Brackets

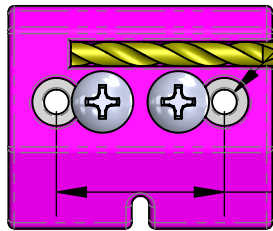

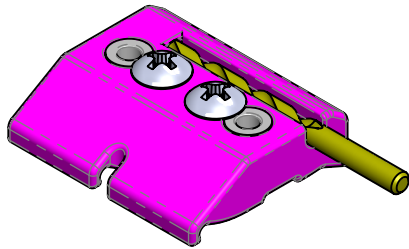

Purpose: 1) To show how a Tag Bracket is installed; and
2) To show how the Tag Bracket Drill Jig is used.

Features of Gen 3 Tag Brackets:

- Gen 3 Tag Brackets now have over-molded ends that provide a soft and smooth area for the tag to be inserted through.
- The "cabinet" bracket is the same except for the now over-molded cover.
- The Slider handle now has its own bracket that gets attached to the handle with rivets.
- A properly applied security tag will prevent the "sliding AND the "secure"
