The CAEM Group.

CAEM is a Glocal company for manufacturing and services related to the Shopfitting and retail industry. From its historical Headquarters in Subbiano Italy, the Group is constantly evolving and includes several strong companies around the World making Caem not only Global but Local to you. CAEM supplies modular shelving on a global scale and constantly seeks to improve and exceed each customer's needs. Glocal means that this is YOUR Caem.

T25

T25 is the CAEM global shelving system. T25 is fully modular and is based on a patented connection between the base and the upright. This durable and flexible system offers unique advantages like an outstanding weight load capacity, removable back panels, 25mm / 1" spacing of upright slots, slim shelf edges and hinging plastic price rails for extra space in the facings.

T25 Hinging Epos

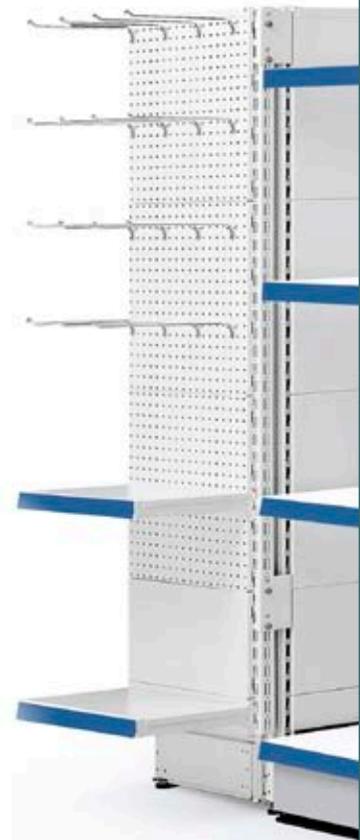

4Post-TOP

4Post-FRONT

T25 includes wire shelves with the edge profile of standard metal shelves. The same fronts and dividers can be used in wire shelves.

TN9.

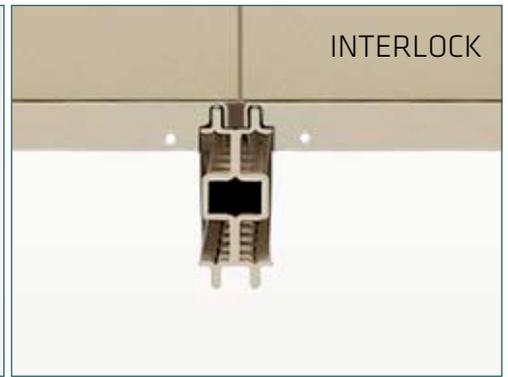

TN9 Shelving System is based on the unique TN9 upright profile which allows infinite options in terms of configurations and options. TN9 applications extends to every retail market.

S50.

S50 is the compatible shelving system made by Caem. Specifically designed with a "H" slot upright with 50mm spacing.

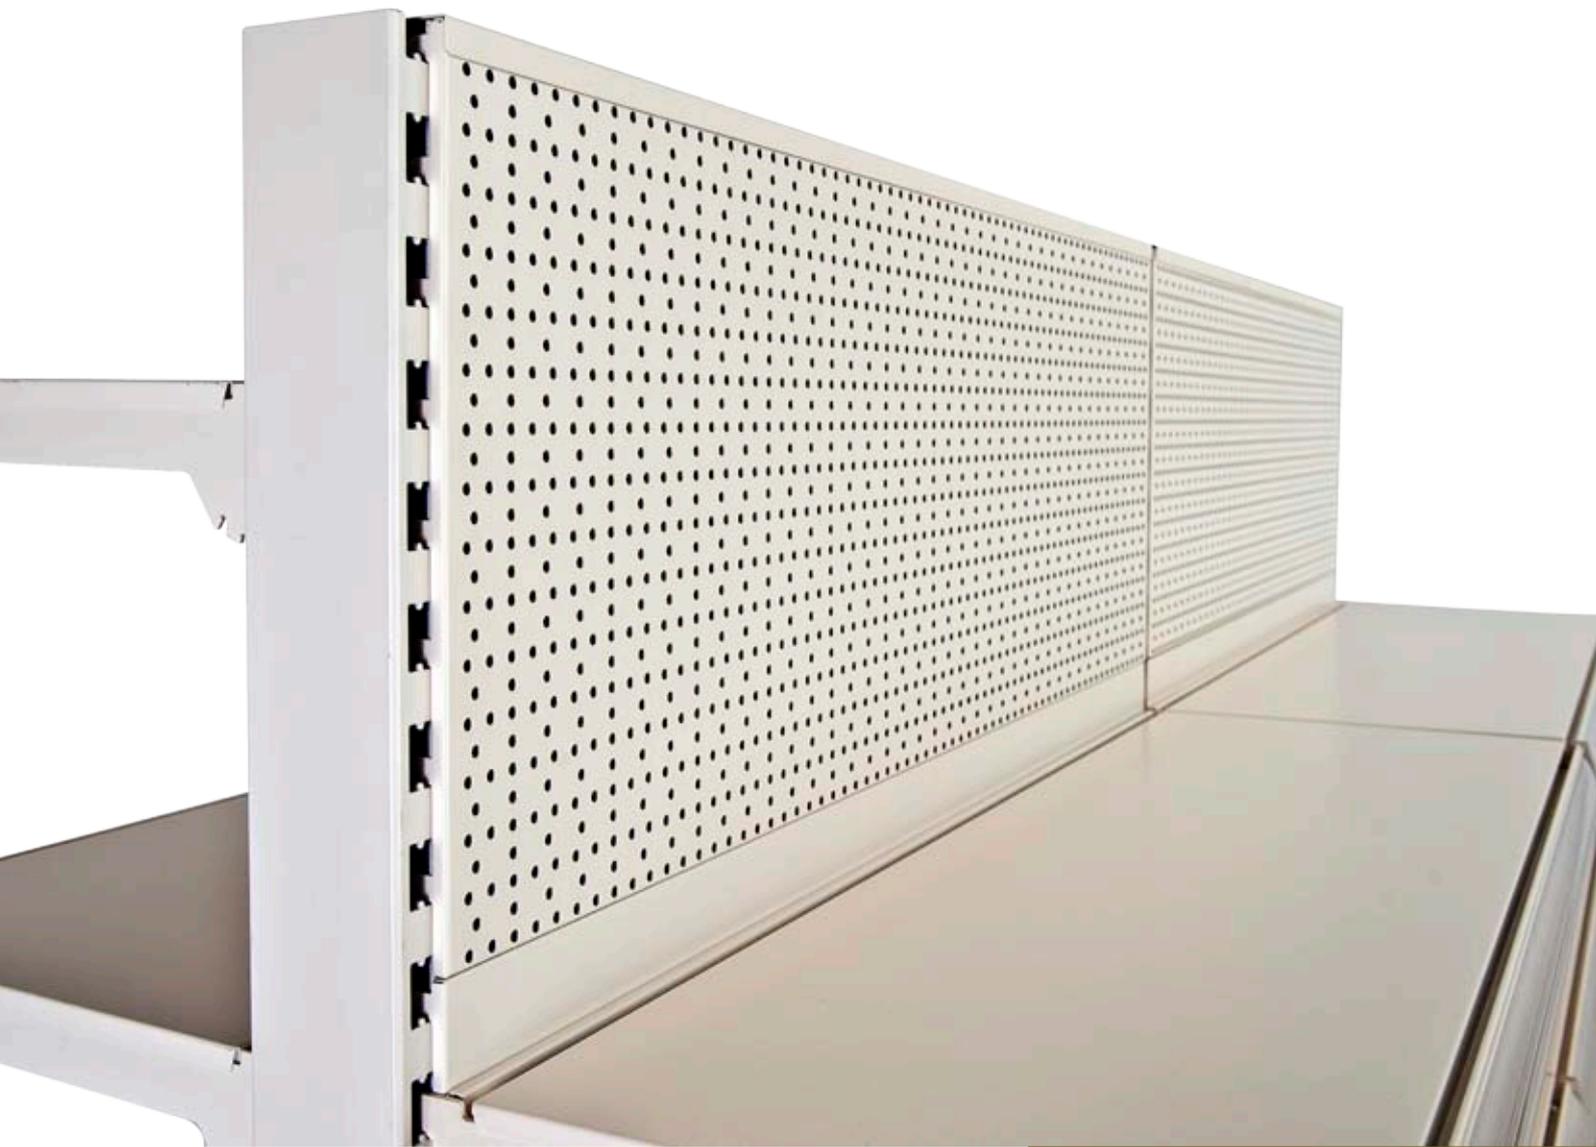

S50 gives retailers who are committed to 50mm systems the freedom to choose a competitive, quality and compatible alternative solution manufactured by CAEM.

S50 is 50mm compatible shelving

Perforated Back Panel

Front upright

GP5.

GP5 is the rack system for integrated applications. Thanks to the specific design, GP5 makes it competitive to have a rack for upper stock together with a shelving for display on the lower area.

MAG.

MAG System is the four upright system based on single piece shelving. There are no back panels in MAG system and totally boltless. Accessories like hanging bars are totally modular.

INFINITY

FIFTH AVENUE.

Fifth Avenue delivers a 'designer' touch to the retail space. The absence of back panels leaves free of action to architects for wall decorations. The uprights standing away from the walls generate newer impact on customers and fresher display.

FIFTH
AVENUE

MEDIDRAWER.

Medidrawer is the drawer for stocking medicines in prescription areas. It features a lock in and lock out position and flexible system of internal partitioning, with thin materials to leave more space for products. Having one system for shopping and prescription area represent a strong advantage in terms of flexibility for the shop keeper.

Medidrawer mounts horizontal or inclined in any of the CAEM systems.

A complete range of back-to-front and side-to-side dividers deliver infinite configuration options of the compartments

RXDRAWER.

RX Drawer is the drawer cabinet solution for stocking medicines in the prescription areas of pharmacies. The volume occupied is nearly 100% usable for product stock. The system is uniquely competitive thanks to new automated manufacturing technologies.
