

## BUCKET ELEVATOR

### Vertical Bulk Material Conveyor

Roff's Bucket Elevator is a space-saving vertical conveyor for small to commercial-scale milling. Adjustable belt tension allows you to move hard grains to powdery products. It is easy to maintain with simple removable covers and replaceable belts and buckets. Also, control heat and dust by adding additional aspirators that prevent dust explosions and moisture build-up. Roff's Bucket Elevator's superior-quality and low power consumption make it the ideal workhorse for entrepreneurs looking to add efficiency and quality to their mill.

# MACHINES THAT DRIVE YOUR BUSINESS

## Performance

	Full Bucket Version:	Half Bucket Version:
Maize	15 000 kg/h	7 500 kg/h
Maize Meal	13 000 kg/h	6 500 kg/h
Lengths	2 - 10m	
Other Lengths Available	Yes	
Number of Motors	1	
Motor Power	1.5 kW	

## Highlights

- > Low power consumption
- > Adjustable belt tension
- > Removable covers for inspection
- > Replaceable belt and buckets
- > Durable materials
- > Easy installation
- > Easy maintenance
- > Low noise levels
- > Optional aspiration points
