

DEGERMINATOR TH

Maize & Brewer's Grit Degerminator

The Degerminator TH series is the ideal machine for detaching bran and germ from the endosperm in maize. The machine consists of a conical inner cone which rotates and rubs the maize kernels against an outer cone. It is best suited to milling operations that deliver super refined maize meal and brewer's grits.

MACHINES THAT DRIVE PERFORMANCE

Capacity and Specifications

Performance:	2000-3000kg/h @ 45kW
	3500-4500kg/h @ 55kW
	5000-6000kg/h @ 75kW
Motor x 1 (380V):	45kW or 55kW or 75kW
Screens:	2
Weight:	± 1200kg
Shipping Dimensions (mm):	2530(L) X 1000(W) X 1842(H)

Highlights

- > Low power consumption
- > Adjustable cones for various size maize kernels
- > Adjustable discharge valve
- > Long lasting durable steel screens
- > Maize grit of less than 1% fat content can be achieved
- > Minimum maintenance required
