

ROFF[®] MILLING

MACHINES THAT DRIVE SUCCESS

HAMMER MILL 100 ELECTRIC

Grain Feed Processing

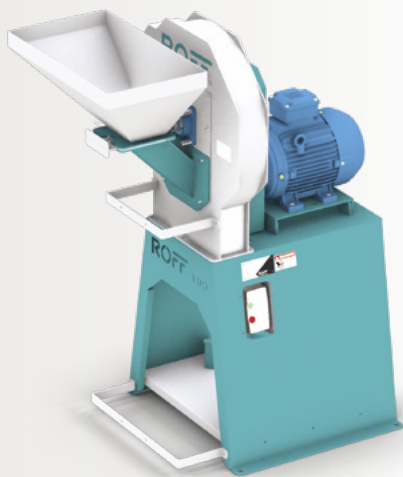

The Hammer Mill 100 is the ideal machine for cutting hard grains and lucerne into smaller sizes. This machine is compact, fast to install and easy to use. Ideal for use in small size dairies, piggeries, livestock farms and horse farms.

MACHINES THAT DRIVE PERFORMANCE

Product Application

Lucerne Hopper

With Optional Grain Hopper

Capacity and Specifications

Maize	2mm - 320kg/h
	3mm - 420kg/h
	5mm - 750kg/h
	10mm - 1400kg/h

Lucerne	25mm - 800kg/h
----------------	----------------

Number of Blades:	8 - rotatable
Number of Motors:	1
Motor Power:	5.5kW 380V
Starter:	Direct On Line (DOL)
Included Screens:	2mm, 10mm, 16mm, 25.4mm
Weight:	± 186kg
Dimensions (lucerne hopper):	1337(L) x 842(W) x 1396(H)
Crating Dimensions (mm):	900(L) x 900(W) x 1550(H)

Highlights

- > Lucern hopper included, optional Grain hopper
- > Quality laser cut parts
- > Casing is manufactured from 4mm mild steel
- > Blades can be rotated to utilize all four cutting edges
- > Blades can be replaced when blunt
- > Screens can easily be replaced
- > Interchangeable screens enables the manufacturing of variable product sizes
- > Shafts rotate independently, second shaft rotates on separate flange bearing
