

MICRO VITAMIN DOSER

Accurate Additive Feeder

The Micro Doser Feeder - to accurately feed small capacity dry products such as vitamins into meal. This unique machine consists of an inlet hopper, a feeder as well as measuring wheel. The feeder can be installed in tandem to feed various micro ingredients used in food, chemical and pharmaceutical industries.

MACHINES THAT DRIVE PERFORMANCE

Capacity and Specifications

Motor x 1 (220V):	Induction
Starter:	1
	Variable frequency drive
Volume of capacity:	0.14ml/cavity
	In measuring wheel
Weight:	± 83KG
Shipping Dimensions (mm):	1620(L) X 460(W) X 590(H)

Highlights

- > Product stream can be controlled and easily calibrated
- > Product contact areas is manufactured from 3CR12 stainless steel
- > High grade sticky ingredients can be handled without bridging
- > Easy installation and minimum maintenance required
