

## P6 CLEANER

### Pre-cleaner

The P6 Cleaner is the ideal machine for pre-cleaning of medium capacities maize, wheat and other grains. The machine consists of an inlet hopper and screening section with two screens. Ideal for general grain cleaning and medium capacity rubble in milling operations.

# MACHINES THAT DRIVE PERFORMANCE

## Capacity and Specifications

Performance:	4000kg/h maize
Motors @ 0.55kw 380v:	1
Starter:	Direct on line (DOL)
Screens:	2
	590 x 1010
Weight:	± 250kg
Shipping Dimensions (mm):	2000(L) X 1500(W) X 1700(H)

## Highlights

- > Low Power Consumption
- > Removable screens for easy cleaning
- > Easily interchangeable screens for cleaning different grain products
- > Easy installation and minimum maintenance required
- > Cost effective
