Neutral Engine Start System

The engine cannot be started unless the shut-off lever is in the lock position for safe operation.

Hydraulic Pilot Control

Hydraulic pilot control levers provide light, smooth control of the front, blade, swing and travel. The levers are ergonomically arranged for easier and less tiring operation.

Adjustable Crawlers and Blade

Tracks can be extended and retracted by control lever: retracted for truck transport and easy access to narrow job sites; and extended for surefooted excavation.

980mm

Easy to transport by trailer due to its compact dimensions and low weight

Easy to maintain

Vertically Sliding Engine Cover

The upright engine cover, upgraded from the conventional model, slides vertically with less rearward projection for ease of maintenance in confined spaces.

Enlarged Fuel inlet

Large fuel port has been fitted as per larger Airman models for quick filling.

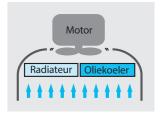

Easy Access for Engine Maintenance

With the seat tilted up, the top of engine is exposed for easy maintenance.

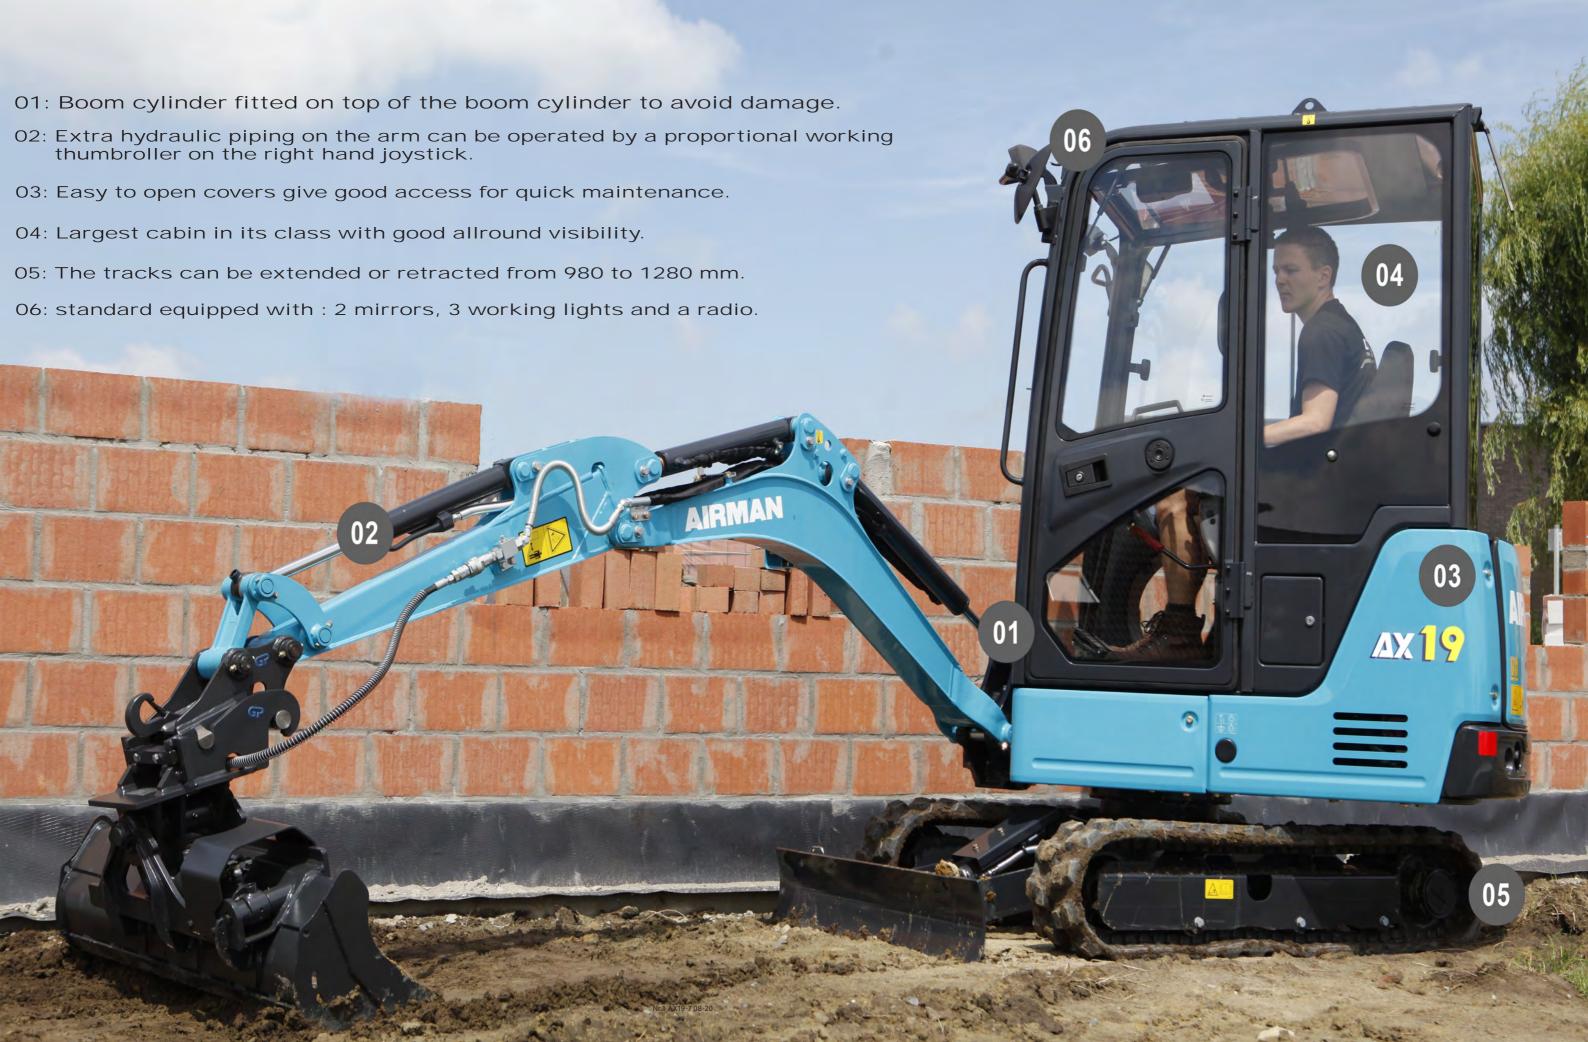

Easy to clean Radiator

The radiator and oil cooler are arranged side by side for easy cleaning. Ventilation ports on the radiator cover are enlarged for more efficient cooling.

LIFTING CAPACITIES (Without bucket)

1. Ratings are based on ISO 10567.

2. Lifting capacity does not exceed 75% of tipping load with the machine on firm,

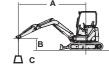

level ground or 87% full hydraulic capacity.

3. The load point is the center-line of the bucket pivot mounting pin on the arm.

4. *Indicates load limited by hydraulic capacity.

5. 0 m = ground.

 $For lifting \ capacities, subtract \ bucket \ and \ quick \ hitch \ weight \ from \ lifting \ capacities \ without \ bucket.$

SAFETY

- Operate safely in accordance with the proper operation manual.
- To prevent troubles and accidents, make sure to perform daily and preventive maintenance checks.
