

CASE STUDY

RETURN ON INVESTMENT DEEP DIVE

BACKGROUND

Located in the Southeast region of the United States, Ochsner serves a highly diverse population. In terms of specialty referrals, it can be difficult to identify key physicians and expand geography from within the system. Ochsner partnered with Dximity to utilize our referral targeting model in tandem with historic referral patterns. Together, we are reaching the best physicians for referral campaigns.

Physicians value receiving relevant, engaging content on a digital platform that they are already utilizing regularly in their practice. Our proprietary patient acquisition targeting, the Referral Model, combines our targeting capabilities and our 56M+ colleague connections to identify the ideal prospects for enhancing referral patterns for highly ranked medical systems such as Ochsner.

// We found actual, quantifiable results that showed we had new referral patterns and patients from physicians that hadn't referred to us before outside of our geographic footprint. We see Dximity as a mechanism to help us gain new physician relationships, and with that comes the downstream referrals and relationships that we are gaining around the Gulf South.

DONNY LAWRENCE

Vice President of Business Development, Ochsner Health System

Dximity, provides an opportunity for hospitals to share their greatest achievements within a trusted environment. With a verified platform and access to a highly engaged group, our array of Hospital Solutions helps our clients achieve their physician marketing goals, including elevating brand awareness and increasing patient referrals.

KEYS TO SUCCESS

Short and sweet: Physicians are busy and will likely read your messages on a mobile device. The more succinct the message, the better the response rate.

Know your neighborhood: Ochsner's knowledge of Gulf South referral patterns helped Dximity to narrow its targeting.

Tailor to your target: Choose content that is highly relevant to your audience to reach the highest potential targets.

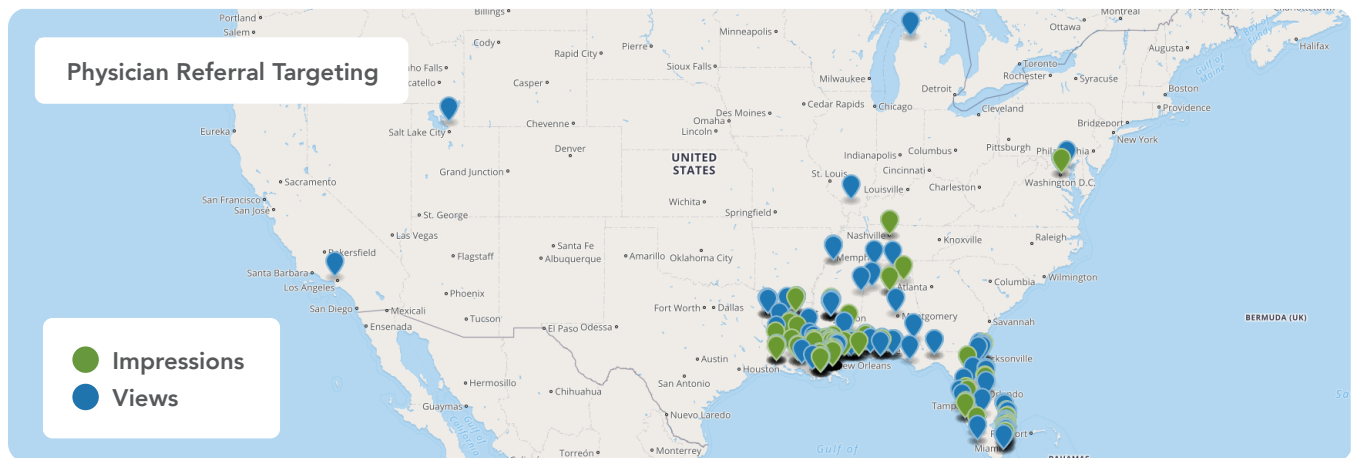

OCHSNER + DOXIMITY

During this campaign, which began in September 2018, Ochsner selected four physicians to represent four service lines: ENT, Cardiology, Oncology, and Neurology.

Ochsner, along with the Doximity Client Success team, crafted personalized emails with the featured physicians, highlighting recent publications, current clinical research, upcoming symposiums, or other items of interest to referring physicians at other health systems. Using Doximity's robust targeting platform and extensive data sets, Ochsner generated their list of referring physicians to target by reviewing hospital affiliation, geography, board-certifications, network activity, among others.

Ochsner has experienced tremendous value from the program, including open rates of 62%, in comparison with the average benchmark of 51% for hospitals using Colleague Connect® on Doximity. As a highly strategic group who targets physicians wisely and has tightened the geography of interest, Ochsner was able to confidently move forward with the Referral Model to great success across all four service lines, resulting in a 30:1 ROI for the program.

In a region of the country that is not seeing a large population increase, it is tremendously valuable for Ochsner to grow their Doximity social network in order to organically engage with their connections on a deeper level.

ACTUAL REPLIES FROM PHYSICIANS

// Perfect. I actually do have some patients. Are you in New Orleans or Baton Rouge?

CARDIOLOGIST
BATON ROUGE, LA

// John, thank you for your email. I have a long history with Dr. Smith and look forward to working with you.

ENT SURGEON
EUNICE, LA

// Thanks Anne for your information. I will definitely keep you in mind if and when I need a neurology input
