

NEW!

ORAPRO[®]

Meet the ORAPRO family of
Orthodontic Brackets

We know orthodontics. With more than a century of combined orthodontic expertise, we're experts at connecting clinicians with the latest innovations in brackets, wires, elastomerics, advanced metal instruments, infection control solutions, and almost everything else in between.

With more than 130 years of combined service, we're a trusted orthodontic partner joined by reputable dental companies, including OrthoQuest, The Orthodontic Store and many more, as we continue to rapidly grow.

We know orthodontics. That's why we created the solutions that help you keep things moving! As a partner in making your practice thrive, Young Specialties provides:

- Tenured, knowledgeable sales teams
- Expansive range of premium, yet affordable products
- A seamless supplier transition process
- Both online AND in-office access to programs
- A simple, yet comprehensive online directory
- A comprehensive library of marketing resources

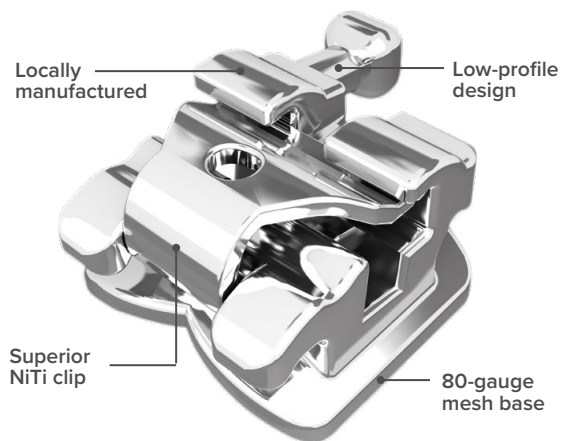

Partnering with us is easy! Call us at **800-558-6684**, email **support@youngspecialties.com** or visit **www.youngspecialties.com**. Sign up to receive email updates on product tips, new products, industry trends, training programs or promotional offerings.

Bringing Your Patients' Teeth Together

ORAPRO® SL Active Self-Ligating Brackets

Our ORAPRO SL Active Self-Ligating brackets utilize an MIM low-profile design. As one of the smallest brackets on the market with smooth, contoured edges, your patients will enjoy greater comfort during treatment. With a highly flexible NiTi clip and a full slot-width size door, allowing excellent rotational control, your practice will experience quicker adjustments and simpler archwire changes. In short, ORAPRO SL Active Self-Ligating brackets deliver the two most important ingredients a successful practice needs: superior, predictable outcomes and an exceptional, on-time patient experience.

ORAPRO® Traditional™ Stainless Steel Brackets

Our Traditional Stainless Steel brackets are the ultimate in stainless steel pre-adjusted brackets. The premium grade materials and manufacturing techniques provide for exceptional strength and prescription integrity. The low profile design offers ample under tie wing space for easy ligation, and ensures patient comfort. The mesh base is designed to work effectively with any adhesive system, however, we offer and recommend ORAPRO products. Hooks are optional on all cuspid and bicuspid brackets. Brackets are marked on the distolingual tie wing.

Bringing Your Patients' Teeth Together

ORAPRO® Merit™ Stainless Steel Brackets

Merit™ Stainless Steel Brackets are manufactured using metal injection molding (MIM) technology for unsurpassed precision and quality. By using this technique, we are able to significantly reduce friction and improve sliding mechanics. The low profile design ensures patient comfort.

ORAPRO® Equation™ Brackets

Equation self-ligating brackets feature a door that is easy to use, locks in place, and opens in such a way that a clear pathway is left for wire insertion. The door has an inset circle for the tip of the opening instrument. When the instrument is placed into the inset, a light pulling motion will open the door toward the occlusal surface. When the wire is seated, you may easily close the door with your finger. You will experience the best in sliding mechanics with Equation.

ORAPRO® Avair® Aesthetic Brackets

Avair® brackets are almost invisible on the teeth for near-perfect aesthetics. Made from a hybrid biocompatible material that is a dispersion of Acrylic and two different copolymers, with a small amount of polycrystalline alumina for increased strength. The material for Avair® is the most sophisticated and advanced stage of technology and science.
