Questions testing your knowledge of words (synonyms) and your ability to create ideas (analogies)

How are my scores calculated?

Upper Level and Middle Level SSAT: Scores are calculated by awarding one point for each correct answer and subtracting one-quarter of one point for each incorrect answer.

Elementary Level SSAT: Scores are calculated by awarding one point for each correct answer and zero points for each incorrect answer.

*All scores are scaled scores.

What is a score range?

We provide a score range to emphasize the possibility of small score differences if you had taken a different edition of the test instead of the one you took, accounting for changes in difficulty and different editions of the test.

A statistical procedure called "equating" is used to adjust for these differences. Even after these adjustments, no single test score provides a perfectly accurate estimate of your proficiency.
