

# Enrich SSAT Score Reports With Applicant Comparison Data

Schools accepting SSAT results can enrich score reports with comparison data between current applicants and students who previously applied and enrolled. This additional insight helps contextualize where a student may be poised for success or require support in the school's programs.

On each report, the comparison breakdown juxtaposes the applicant's total, verbal, quantitative, and reading results with applicants, accepted students, and enrolled students from the previous admissions year.

APPLICANT COMPARISON DATA FOR Sample School (GRADE 10)  
Your school's applicant comparison data must be provided in order to complete this chart.

Please note: The accepted and enrolled data per student isn't displayed anywhere else in the EMA system.

## How do you get comparison data on score reports?

In EMA's member portal, visit the [Applicant Comparison Data](#) page under the [SSAT Scores menu](#). Download the pre-populated spreadsheet listing all students who submitted SSAT scores to your school in the previous admissions year, and then simply fill in the Applied, Accepted, and Enrolled fields with an X.

Applied	Accepted	Enrolled	Grade	Last Name	First Name
(X)	(X)	(X)			
X	X	X	9	Bell	Katie
X	X		9	Finch-Fletchley	Justin
X	X	X	9	Johnson	Angelina
X	X	X	10	Patil	Padma
X			9	Bletchley	Miles
X			9	Harper	Augustus
X			11	Chang	Cho
			9	Belby	Marcus
			9	Davies	Roger
			10	MacMillan	Ernest
			9	Rivers	Oliver
			9	Fawcett	Sarah

If students are missing from the sheet because they submitted scores directly to the school, you can manually add them in new rows.

Return the spreadsheet as a .csv or Excel file to Diana Davidian at [ddavidian@enrollment.org](mailto:ddavidian@enrollment.org). For data privacy, please either password protect the sheet and send the password in a separate email, or securely store the file in Google Drive and share it with Diana.
